ops! We must correct an error in issue no. 2. The Start and Stop tones were incorrectly identified. The following are the correct tones, guaranteed to work perfectly. Please, if you save back issues, or pass them out, change the info on them right now.

Remember the blue box?
We have received, in response to the blue box story, requests from many people for schematics. We have no such schematics, and would not publish them if we did, for that would be unlawful activity.

The following is a reader-supplied schematic for well-known phase shift oscillator. This transistor oscillator can be operated from a 9-volt battery, but its output is not sufficient to feed a speaker. Next month we will show a mixing and boosting circuit for amplification through a speaker. This circuit is useful in the 500-5000 cycle range and as such makes an easy-to-build, low-cost, toy organ.

They've been fuckin' us over good. We oocked a hum-a-mess and after end- less arguments with our machine ladies (they're all level for low down clerks) we agreed to mail them the money. They screamed back. So, we want you to bring it down in person tomorrow. What fuckers! This country's gotten too dependent on them. Send all the anti-phone shit you got. E.I., Wash., D.C., Sept. 16.

Questions:
1. How can I get around paying a $50 installation deposit? 2. How can an extra line be installed?

...If you're daring, any friends where you live, and you need an extra outgoing line, the junction box or mini-closet. The lines connect which are used. The remaining two are pair to some street's line, and in on his number. Don't leave the box or switch [issue no. 1]. If you don't have them in the box near the elevator. Bring a knife or scissors, and a shopping bag. Although there are some cool phone repairmen around, many are to be feared. If you have a repair or installation visit, don't leave dope, non-Bell phones, or subversive literature just lying around, or he may report you to his supervisor for suspicion. That may result in a bust, through cooperation with the local precinct, or a tap on your line. This isn't paranoia, it's fucking good sense.

Church Withholds Phone Tax

The congregation of Hollis Unitarian Church escalated its protest against American war policies yesterday by not paying the federal excise tax portion of the church's monthlly telephone bill. TICK CREEK, NC (CMC) - American Telephone and Telegraph, one of the largest war contractors and largest employers in the United States, has been charged with stealing millions of dollars from the underground economy.

If convicted, the implicatfons are not clear. AT&T may attempt busts of other newspapers in other areas. But they lose no matter what they do if we exploit the contradictions. (How they have to prove in court that they have the right to charge for public services. The dis- trict telephone manager who signed the warrant is quoted as saying "We definitely see ourselves as the establishment.")

Brothers and Sisters,

Need your help on a special project for our new magazine collective in Houston...I'm planning a documentary special on phone phreaking and related subjects and need as much info as is possible...Could you please send me what info you have and possibly the names of other phone phreaks and phone repairmen around the country? Can you relay my information into the phone network and if they can get a trace on them, they can call us here at Pacifica 713-224-4000, no collect calls please I'm poor as hell.

Next time you see a phone man talk awhile, then ask if you can set up an intercom with a phone that bell'll "louse" from his truck. I got free a new decorater color phone. Mustn't add.

A reader

If you're going to a big pig hotel somewhere if you need a phone. They have them in the lobby for calling within the building. If they're in a bad location, go up a few flights. They probably'll have them in the hall near the elevator. Bring a knife or scissors, and a shopping bag.

The next trial date has not been set. We are gathering information to prove that some of their evidence is based on illegal tappe. It took the state and local pigs three months to file us. One of us spent three weeks in a woodland hideout while the $1000 bond was being secured.

We live in rural North Carolina. One of the pigs that was visiting us while looking for the fugitives said "If you people don't break it up out here we're going to have to arrest you for subversion, fornication, and adultery." We wanted to tell him none of us were married.

We doubt a phone can electrocute you. We live in rural North Carolina. One of the pigs that was visiting us while looking for the fugitives said "If you people don't break it up out here we're going to have to arrest you for subversion, fornication, and adultery." We wanted to tell him none of us were married.

call anywhere...but dial with care

Bell Telephone, subsidiary of AT&T with 1970 assets of $49.6 Billion, the world's big- gest pig corporation, is losing millions monthly on fake credit card calls. They are not taking it lightly. Their methods of attempted repression would make the FBI proud. Here's how they're going about it:

First, the phone company sometimes makes the operator that took a fake credit card call attempt to trace the caller. They tell her(them) that they will take the cost of the call out of their salary if she doesn't try to find out who made the call. The operator will call the number that you placed the call to, attempting to track you down. Obviously only make credit card calls if you are not under the same names as the credit card call was made from. Sometimes they bill the number called. Sometimes they put it on the bill as a third party charge or a collect call. REFUSE TO PAY. Keep track of the calls you actually do make and the credit card calls you receive (so you can refuse to pay them).

The operator gets a lead to who made the credit card call, she turns the name over to the telephone security division. They have special security guys that can spend their full time tracking us down. They will stop at nothing. They stalk out phone booths; don't always use the same location to call from. In some states they are allowed to tap your phone if there is a case of "defrauding the phone co." And of course they tap phones in all states whether they are allowed to or not. Their easiest victims are highschool and university students.
people. They investigate with the cooperation of the school pigs. In high schools they work with the principal. They call the suspected person into the office and give her/him the third degree, promising not to prosecute if they will tell the pigs everyone else making credit card calls. Divide and conquer it's called. At universities, the special telephone security pigs work in conjunction with the campus cops. They may follow you around and attempt to question you. YOU DO NOT HAVE TO TELL THEM ANYTHING! Refuse to talk without your lawyer present. Above all, do not sign anything. They try to get you to sign a confession just like in the movies. Don't be intimidated by these junior fascists! Throw tomatoes at them; put sugar in their gas tanks. All power to the imagination!

The way we make credit card calls is as important as knowing the system. Operators take many real credit card calls daily and know what the average call sounds like. The average caller is Mr. or Mrs. Pig Businessperson. They come on fast and usually have the number memorized. It sounds suspicious if you sound suspicious if you sound like you are reading it off, or if you say, "841 dash 7767 dash 167N." The beginning numbers are a phone number and should be read as "841 7767" with the last part read as a single unit, 167N. A good opener is, "Operator, credit card call. My number is 893 4452 359J. The number I wish to call is 777-8787." Don't hesitate, memorize your credit card number, and have all the info handy.

Do not call from your home phone. When making a credit card call, you do not have to give the operator the number you are calling from. If she asks, change the last digit or two. Operators usually only know the prefix you are calling from. She may say hold on, and call the number you give to see if it's busy. So if you call from a pay phone, which you should, give her the number of your pay phone, it's cool.

The July 16 (issue 104) BERKELEY TRIBE has much more good info on telephone procedures in ripoffs!

BACK ISSUES cost 50 cents each. Think about it.

No. 1- Credit card code, installing conference lines and free extensions.
No. 2- The Blue Box Story, dialogue with Abbie Hoffman and Russel Baker on Phones.
No. 3- The Telecommand, and other shit.
No. 4- Special Pay phone issue.

Confucious say; "Those who receive YIPL should have small mouth when on telephone."

Now that you're done with this issue, please pass it on to a friend, or post visibly.
