Well, it's a new year, and I feel many of you want to know the full story behind YIPL. My name is Al Bell, and a few of us started this on Mayday, in 1971. YIPL is the result of one phone phreak’s realization that the Military-Industrial Complex is not just a term you learn in school, but a force that controls the planet Earth from the country America. It became apparent to me that the vast majority of people are being used as pawns, as slaves to make a few multi-millionaires even richer. It’s all done through MIC, whose main tactic is Divide and Conquer. Most people don’t agree with me, thus proving how effective that tactic is. So people war with each other, and the pigs get richer. And one company has accumulated such an impressive shelf of pork that this company, more than any other company, represents the robber-barrons that dare to defecate on our world. This company is, in fact, the largest company in the World. Ma Bell is a mother of a fucker.

Though we are quite effective in helping people to steal back what is rightfully theirs, and we have also truly given a veritable kick in the groin, our purpose is mainly to make people think the question, “Why are they ripping off the phone company?”, because once they do the answer will be obvious. YIPL members are actors in a play, and the world is watching. And we’re having a lot of fun!

1973 looks like the year of the climax. The phone company’s on our ass but if they touch us it won’t be quietly. A lot of people hate the phone company from down deep, but they’ve never really given it enough thought to link it with world problems. If YIPL goes on trial, people are going to ask themselves questions, and that’s all we want.

YIPL has in the past been too difficult to understand, and we’re trying to understand. Often we’ve been technically simplistic, and we apologize to the numerous geniuses out there who patiently write in and tell us, but we’re learning. Basically we’re trying to digest the hard stuff, and print in simpler terms for use by beginners up. But there are lots of things all of us can do. For example, Ma Bells new ways of catching blue boxers will be fouled up if we put in false indications of a BB. One way is to pick up your phone, and all your friends, dial long-distance info, and whistling 2600 'The PHONE COMPANY has its say... is forced to pay... MISSION mumbles "ork."

Just about everyone has something to offer to a readersupplied newsletter. Ripoffs, recipes, credit card codes, loop numbers, test numbers, outrageous news, computer passwords, overseas city codes, impending investigations, and anything else you’d like to share. We’re never amazed too much by you people, you’re all fantastic. If you’re at all worried about being traced, write us on a business or school typewriter. We’ll destroy your letter immediately if you want us to.

YIPL needs more readers. Okay? Please help us, yourselfs, and your friends by having all your friends subscribe now, especially if they’re in the midwest, Canada, Florida, Northern New England, and Louisiana, Georgia, Carolina, and Kentucky. We need to round out our distribution.

Don’t miss the opportunity! There is only one YIPL. Help make it great.

The PHONE COMPANY has its say... is forced to pay... MISSION mumbles "ork."

Several readers have written us regarding last month’s highway robbery of the American people by AT&T and the Public Screwing Commission. We feel it inappropriate to comment on the rate increase as we are not affected by the new rates. Yippie!
A SURE CURE FOR MESSAGE UNITS

The major cause of high phone message units are those little messages that come into your home, perhaps from your neighbors or friends. This problem can be quite irritating, but there are several ways to reduce or eliminate them.

1. **Build a T Network for Fun & Profit**

   - **What you need:**
     - 2 lines
     - A 12-volt battery
     - A phone decoder
     - A phone line

   - **What to do:**
     1. Connect one phone to the other using a 12-volt battery. The phone will ring and you will be able to hear the message units.
     2. Use the phone decoder to listen to the message units. The decoder will allow you to hear the messages without the need for a battery.

2. **VoicePrint Laboratories**

   - **Special Features:**
     - Model has polarity-independent input circuitry, negligible line loading and is internally protected against voltage line transients.
     - Internal protection against voltage line transients.
     - The device can be used with any type of phone, including touch-tone, trim-line, speaker-phone, card dialer, etc.

3. **Teletronics**

   - **Special Features:**
     - Only detects pulses greater than 0.1 second, but the Hektronics device only detects pulses greater than 0.2 second.
     - The device is designed to be used with any type of phone, including touch-tone, trim-line, speaker-phone, card dialer, etc.

4. **Destructive Assistance**

   - **Special Features:**
     - Can be used to break into any phone system and access any information.
     - The device can be used to break into any phone system and access any information.

5. **Blue Box**

   - **Special Features:**
     - Prints out any number you dial with a Blue Box after it detects 2600 cycles on the line. Though the device can be used to break into any phone system and access any information.
     - The device can be used to break into any phone system and access any information.

6. **Boom Box**

   - **Special Features:**
     - Prints out any number you dial with a Boom Box after it detects 2600 cycles on the line. Though the device can be used to break into any phone system and access any information.
     - The device can be used to break into any phone system and access any information.

**Note:** Always be careful when using any type of phone decoder or destructive assistance device. It is illegal to use these devices to access information without permission. Always be careful when using any type of phone decoder or destructive assistance device. It is illegal to use these devices to access information without permission.
LAST CHANCE!

"Steal This Rook" by Abbie Hoffman, the most controversial book of our time is being called off sale because the distributor ended up stealing the bread. We have 500 copies left. Price $2.50 (includes postage) - 50 books - $55.00. Pirate Editions, 640 Broadway, N.Y., N.Y. 10012

John Draper, alleged to be Captain Crunch, pleaded no contest to Toll Fraud charges on November 28 and received a $1000 fine and 5 years probation. John's glad the whole thing is over, even though the plea bargaining was a little unfairly balanced. Anyway the real Captain Crunch informs us that the busy test for San Jose is 199, and that if any of our readers getting an overseas trunk by dialing KP 011 XXX 35 they should realize that 011 will only work on IOTC accessible lines, such as N.Y. or California information. Most 800 numbers will not accept 011. The Captain also says that stacking trunks is now too dangerous and has no useful purposes.

1973 CREDIT CODE

New! The New Credit Card Code is the same as last year's except the code letters are different and the letter stands for the 7th digit (last) of the telephone number.
Example- 041-5430-136N-Honeywell of Minneapolis.
1 2 3 4 5 6 7 8 9 0
Follow the number of a pig corporation with the code number for the city it's in. Add the letter for the last digit of the phone number and read our Credit Card fact sheet.

That's all there is to it!
N.Y. - 072, 074, 021 L.A. - 182 Detroit - 096, 093
Atlanta - 035 Boston - 001 Houston - 101 Miami - 044

British Phone System
Rigged For Free Calls

LONDON (AP) - Police are on the trail of the phantom who rigged a British city's telephone exchange so that 2,000 students could make calls all over the world for free.

Government investigators traced the secret wiring in the ancient medieval England city of Bath last month.

But they fear the phantom has already wired up other cities for free calls that are costing the Post Office, which operates Britain's telephone system, a fortune in lost revenue.

And worse, they believe there may be more than one phantom.

"This is a serious national problem," a Post Office spokesman said. "We are making investigations in other towns all over the country to get to the bottom of this fraud."

The Bath affair was the first "dial-a-diddle" fraud investigators had cracked.

They found that the Kingshead exchange in the historic city, which dates back to Roman Times, had been illegally wired and that at least 2,000 students at the university there knew about it.

Investigators installed a monitor that enabled them to trace the illegal calls and trap nine students. Each was fined a nominal two pounds, or $4.75, last week for "dishonestly obtaining electricity from the Post Office."

But the university's students and many townpeople knew the special dialing code that activated the hook-up to obtain an open line to anywhere in the world without the call being registered. Police said the secret circuit was "extensively used."

The president of the university's S.U.I., Union Bill Mogey, said: "Just about everyone here knew the code."

"It's been going on for a long time and it seems the Post Office left it operating to try to catch the people responsible for putting it there. But they got the wrong people."

Police said there was "insufficient evidence at this stage to establish the identity of the person or persons responsible."
