<tbody>
<tr>
<td>1LT</td>
<td>first lieutenant</td>
</tr>
<tr>
<td>2S1</td>
<td>A Soviet self-propelled howitzer.</td>
</tr>
<tr>
<td>A</td>
<td>armed</td>
</tr>
<tr>
<td>M</td>
<td>avenue of approach</td>
</tr>
<tr>
<td>abn</td>
<td>airborne</td>
</tr>
<tr>
<td>ACE</td>
<td>armored combat earthmover (M9) - A highly mobile armored, amphibious combat earthmover capable of dozing, excavating, rough grading, and ditching functions.</td>
</tr>
<tr>
<td>AD</td>
<td>armor division</td>
</tr>
<tr>
<td>ADA</td>
<td>air defense artillery - Weapons and equipment for actively combatting air targets from the ground.</td>
</tr>
<tr>
<td>ADAM</td>
<td>area denial artillery munition - An artillery round containing 36 mines (M731/M731A1 with self-destruct time of 4 hours or M692/M692A1 with self-destruct time of 48 hours). The ADAM contains only antipersonnel mines.</td>
</tr>
<tr>
<td>ADC</td>
<td>area damage control - Measures taken before, during, or after hostile action or natural or man-made disasters to reduce the probability of damage and to minimize its effects.</td>
</tr>
<tr>
<td>ADE</td>
<td>Assistant Division Engineer</td>
</tr>
<tr>
<td>AHD</td>
<td>antihandling device - A device arranged to detonate a mine when it is disturbed.</td>
</tr>
<tr>
<td>AI</td>
<td>area of interest</td>
</tr>
<tr>
<td>ALO</td>
<td>aviation liaison officer - An officer (aviator/pilot) attached to a ground unit who functions as primary advisor to the ground commander regarding air operations matters.</td>
</tr>
<tr>
<td>ammo</td>
<td>ammunition</td>
</tr>
<tr>
<td>AP</td>
<td>antipersonnel mine - A mine designed to kill or wound soldiers.</td>
</tr>
<tr>
<td>APB</td>
<td>antipersonnel blast - An antipersonnel mine designed to cripple the foot or leg of the soldier who steps on it. It can also burst the tire of a wheeled vehicle that passes over it.</td>
</tr>
<tr>
<td>APC</td>
<td>armored personnel carrier - A lightly armored, highly mobile, full-tracked vehicle, amphibious and air-droppable, used primarily</td>
</tr>
</tbody>
</table>
for transporting personnel and their individual equipment during tactical operations.

**APF**

**antipersonnel fragmentation** - An antipersonnel mine that, when stepped on, throws a canister into the air. The canister bursts and scatters shrapnel throughout the immediate area. A directional aimed fragmentation mine is designed primarily for use against personnel.

**APOBS**

**Antipersonnel Obstacle Breaching System** - A man-portable, line-charge, obstacle-breaching system capable of clearing a footpath through antipersonnel minefield and wire entanglements.

approx

approximate

AR

Army regulation

★ ARDEC

Armament Research Development Center

**ARNG**

Army National Guard

artillery

**ASP**

**ammunition supply point** - A place where ammunition is received from supporting supply points and broken down for distribution to subordinate units.

assault

breach

A breach tactic used by small units (company teams and platoons) to penetrate an enemy’s protective obstacles and seize a foothold within his defense.

**AT**

**antitank mine** - A mine designed to immobilize or destroy a tank

AVLB

armored vehicle launched bridge

AVLM

armored vehicle launched MICLIC

**BAI**

**battlefield air interdiction** - Air operations conducted to destroy, neutralize, or delay the enemy’s military potential before it can be brought to bear effectively against friendly forces.

**BAT-M**

A Soviet tracked engineer dozer.

**b d e**

brigade

**block**

A tactical obstacle intent used to integrate fire planning and obstacle effort to stop an attacker along a specific avenue of approach. Requires extensive obstacle effort and overwhelming direct and indirect fires. Obstacles must be tied into terrain and allow no bypass.

**B M A**

**battery minefield angle**

**BMP**

A Soviet tracked amphibious infantry combat vehicle.

**b n**

battalion
**BOS** Battlefield Operating System

**BP** battle position

**BRDEC** Belvoir Research Development and Engineering Center

**BTR-50/60** A Soviet wheeled amphibious armored personnel carrier.

**BTU** A Soviet tank-mounted dozer blade.

**CAS** close air support

**cav** cavalry

**cbt** combat

**CBU** cluster bomb unit - An aircraft store composed of a dispenser and submunitions.

**cdr** commander

**CEV** combat engineer vehicle - An armored, tracked vehicle that provides engineer support to other combat elements. Vehicle is equipped with a heavy-duty boom, winch, dozer blade, and 165 mm demolition gun.

**CG** commanding general

**them** chemical

**chg** charge

**cL** centerline

**cl** class

**CLAMS** Cleared-Lane Marking System - Allows rapid remote marking of the breached lane, which can be seen at night. It can be mounted on the rear of any M1/M60 tank with the proper adapter assembly.

**clearing operations** The total elimination of an obstacle or unexploded ordnance over a defined area. Normally, clearing is a sustainment engineer task conducted well after total elimination of all direct and indirect fires able to cover the obstacle. Clearing is an extremely resource-intensive, slow operation and is typically assigned to engineers (division or higher).

**cm** centimeter(s)

**co** company

**collapsing circuit** Has a dual role of antihandling or delay action. When any part of the energizing circuit is out or the battery runs down, the contacts will close to complete a separate firing circuit.
A subcomponent of mobility that concentrates solely on the actions taken to counteract a mine or minefield through detecting, reducing, and/or bypassing.

**command post**

**combat support**

**controlled supply rate** - The rate of ammunition consumption that can be allocated, considering the supplies and facilities available, for a given period.

**combat service support**

**cubic**

**deep**

**Department of the Army**

**dispenser control unit**

**degree**

**demolition**

**device**

**diameter**

A Soviet vehicle-mounted mine detector.

A tactical obstacle intent to focus fire planning and obstacle effort to break up an enemy’s formation and assets, and to piecemeal his attack. May be used to separate combat echelons or combat forces from their logistical support.

**division**

**Department of Defense**

**Department of Instruction**

**Department of Training and Doctrine**

**decision support template**

**date-time group**

**drop zone** - A specific area upon which airborne troops, equipment, or supplies are airdropped.
E  executed
ea  each
EA  engagement area
ECM  electronic countermeasures - The division of electronic warfare that involves taking actions to prevent or reduce an enemy’s effective use of the electromagnetic spectrum.
EDD  explosive detector dog
EFSP  engineer forward supply point
EM  enlisted member
engr  engineer
EOBC  Engineer Officer Basic Course
EOD  explosive ordnance disposal - Personnel with special training and equipment who render explosive ordnance (such as bombs, mines, projectiles, and booby traps) safe, make intelligence reports on ordnance, and supervise the safe removal of ordnance.
°F  degrees Fahrenheit
FA  field artillery
FASCAM  family of scatterable mines
FD  firing device
FEBA  forward edge of the battle area - The foremost limits of a series of areas in which ground combat units are deployed.
FIST  fire support team
fix  A tactical obstacle intent to focus fire planning and obstacle effort to slow an attacker within a specified area.
FLOT  forward line of own troops - A line which indicates the most forward positions of friendly forces in any kind of military operations at a specific time. The FLOT normally identifies the forward location of covering and screening forces.
FM  frequency modulated
FM  field manual
FO  forward observer
FPF  final protective fires
The area outside a scatterable minefield’s safety zone that poses significant risk or hazard to friendly maneuver (personnel and vehicles) from shrapnel or an explosively formed penetrator when self-destruction occurs. This area can extend out to 640 meters for AT mines oriented on their sides. This is the maximum possible fragment hazard zone. The risk of being struck at this distance is negligible. Tests indicate that acceptable risk for maneuver is the distance over 235 meters from the outer edges of the minefield safety zone.

FRAGO  fragmentary order
FSCOORD  fire support coordinator - One who conducts the planning and executing of fire so that targets are adequately covered by a suitable weapon or group of weapons.
FSE  fire support element - Used to enhance and speed fire support coordination.
f t  foot, feet
G3  Assistant Chief of Staff, G3 (Operations and Plans)
g a l  gallon(s)
GDP  general defense plan
GEMSS  Ground-Emplaced Mine Scattering System (M128) - A trailer-mounted system that may be towed by a variety of tracked or wheeled vehicles.
GMZ  Gusenichnyy Mino-Zagraditel - A Soviet armored, tracked minelayer.
GPBT  general purpose barbed tape
g r  gram(s)
H  mustard
HCU  hand control unit
HD  distilled mustard
HE  high explosive - Generally applied to the bursting charges for bombs, mines, projectiles, grenades, and demolition charges. Defined by Department of Transportation as materials susceptible to detonation by a blasting cap.
HEMMS  M133 hand-emplaced minefield marking set - A set consisting of lights, signs, tape, wire, poles, pole driver, batteries, and a wooden storage chest. The set is used as a means of safely guiding forces through or around scatterable or conventional minefields.
HEMTT  heavy expanded mobility tactical truck
HIND-D  A Soviet attack helicopter.
HIP  A Soviet medium-lift helicopter.
HMMWV  high-mobility multipurpose wheeled vehicle

</table>
obst  obstacle
OBSTINTEL  obstacles intelligence
Ott  October
OIC  officer in charge
OOD  Otryad Obespecheniya Dvizheniya - A Soviet movement support detachment.
OP  observation post
OPLAN  operation plan - A plan for a single operation or a series of connected operations to be carried out simultaneously or in succession. It is usually based on stated assumptions and is the form of directive employed by higher authority that permits subordinate commanders to prepare supporting plans and orders. The designation plan is usually used instead of order in preparing for operations well in advance. An operation plan may be put into effect at a prescribed time or on signal; it then becomes an operation order.
OPORD  operation order
OPSEC  operations security
ORP  objective rally point
OZ  ounce(s)
P  proposed
PDM  pursuit-deterrent munition
PIR  priority intelligence requirement
PK  probability of kill
pl  platoon
PL  phase line
plt  platoon
PMN  A Soviet pressure-activated, antipersonnel blast mine.
POMZ-2M  A Soviet trip-wire-activated, antipersonnel fragmentation mine.
POZ  Podvizhnyy Otryad Zagrazhdeniya- A Soviet mobile obstacle detachment.
PPMP  A Soviet antipersonnel minefield pattern.
pt  point
QASAS  Quality Assurance Specialist Ammunition Surveillance
qty  quantity
RAAM  remote antiarmor mine - An artillery round containing 9 mines (M741/M741A1 with a 4-hour self-destruct time or M718/M718A1 with a 48-hour self-destruct time). The RAAM contains only antiarmor mines.
RAC  risk assessment code
RAOC  rear area operations center
RCU  remote control unit (M71) - Used to dispense MOPMS mines on command.
RDX  cyclonite
reduce  The creation of a lane through, over, or around an obstacle. In the case of minefield, refers to destroying, neutralizing, removing or bypassing mines. In a breach operation, one of the four breaching fundamentals.
ref  reference
rep  representative
req’d  required
RP  reference point - A prominent, easily located point in the terrain.
rpm  revolutions per minute
rpt  report
rqr  requirement
R&S  reconnaissance and surveillance
RS0  range safety officer
S  safe
S2  Intelligence Officer (US Army)
S3  Operations and Training Officer (US Army)
S4  Supply Officer (US Army)
safety zone  The area where no friendly forces will enter during a scatterable minefield’s life cycle. The dimensions of this area differ between the various delivery systems; however, all outlier mines will be contained. This area may be delineated/marked by a fence (with signs) depending on its relative position on the battlefield.
scat  scatterable
SCATMINWARN  scatterable mine warning - A report used to notify affected units that scatterable mines will be emplaced.
SD  self-destruct
sec  second(s)
SFC  sergeant first class
SFF  self-forging fragmentation - A direct-energy warhead designed to penetrate the armor on a vehicle’s underside or side.
SHU  A rectangular, wooden, box-type, AP, pressure-blast mine similar in appearance and size to a shoe box.
SITREP  situation report - A report giving the situation in the area of a reporting unit or formation.
SM  scatterable mine
SOP  standing operating procedure - A set of instructions covering those features of operations that lend themselves to a definite or standardized procedure without loss of effectiveness. The procedure is applicable unless ordered otherwise.
SOSR  suppression, obscuration, security, and reduction
S&P  stake and platform
sqdn  squadron
SSAN  social security account number
STANAG  Standardization Agreement - The record of an agreement among several or all member nations to adopt similar military equipment, ammunition, supplies, and stores and procedural operations, logistics, and administration.
STRAC  Standards in Training Commission
strip feeder report  A report from the NCOIC to the OIC that indicates what type mines and how many of each type were placed in a strip. A working tool with no set format.
t  ton(s)
T-54, T-55, T-64, and T-72  Soviet main battle tanks.
TAC CP  tactical command post
TAHQ  theater army headquarter

Glossary-12
TAI  tactical area of interest
TC   track commander
TCP  traffic control post
TF   task force
tgt  target
tm   team
TMD  tactical munitions dispenser
TO   theater of operations
TOC  tactical operations center
TRADOC United States Army Training and Doctrine Command
trns trains
TRP  target-reference point
turn  A tactical obstacle intent used to integrate fire planning and obstacle effort to direct an enemy formation off one avenue of approach to an adjacent avenue in support of the scheme of maneuver.

u  under construction
UBL  unit basic load - The quantity of supplies required to be on hand within and movable by a unit or formation. It is expressed according to the wartime organization of the unit or formation and maintained at the prescribed levels.

UHF  ultrahigh frequency
UK   United Kingdom
US   United States
USAEC United States Army Engineer Center
USAR United States Army Reserves
UTM  universal transverse mercator (grid)
VHF  very high frequency
VS   versus
VX   Persistent, highly toxic nerve agent developed in the mid-1950s and absorbed primarily through the skin. It is the US standard nerve agent.
