

1. How to Install

- ① Remove previously installed programs for DAH-1000 (X) by moving to "Program Add/Remove" in Control Panel. Download the attached file "DAH-1000(X)_1012.ZIP" and extract it. Double click the Setup.exe to begin the installation.
- ② Back up important data contained in the existing MP3 PLAYER in advance to users' PC.
- ③ Enter into the Recovery Mode to update.

== How to enter into the Recovery Mode ==

- 1) While pressing the Play button of the Player, connect the USB Cable, and then release the Play button after about 5 seconds.
- 2) "Recovery Device Driver Class" will appear in Device Manager. Check it by going to My Computer → Control Panel → Device Manager.

- ④ After entering the Recovery Mode, go to Start → Program → HyunWon DAH-1000 MP3 Player, now go to either DAH-1000 Update or DAH-1000X Update" according to the model you have. Now execute the update.
- ⑤ When the "Download options" window pops up, check the item of the "Format Data Area" and run the Update by pressing the "Start" button.
 - ※ Be careful since if you check the "Format Data Area," all the data in the player will be erased.
- ⑥ After disconnecting the USB cable, turn the player on so that you can check whether the OS Version 1.012 has been updated or not. (Click the Menu button and check the OS version from the submenu "About")

DAH-1000(X) WM A PD DRM (*Windows Media Audio Potable Device Digital Rights Management*)

© Summary

– DAH-1000(X) enables WMA DRM (protected WMA file contents) produced in its own PC to be played, which you can easily use with Windows Media Player.

© Requirements

© Windows Media Player and WMA DRM files produced by it.

© Order Of Use

– Run the Windows Media Player. Go to "Tools -> Options -> Copy Music", Select "Copy protect music" from "Copy Music." Cck . "OK"

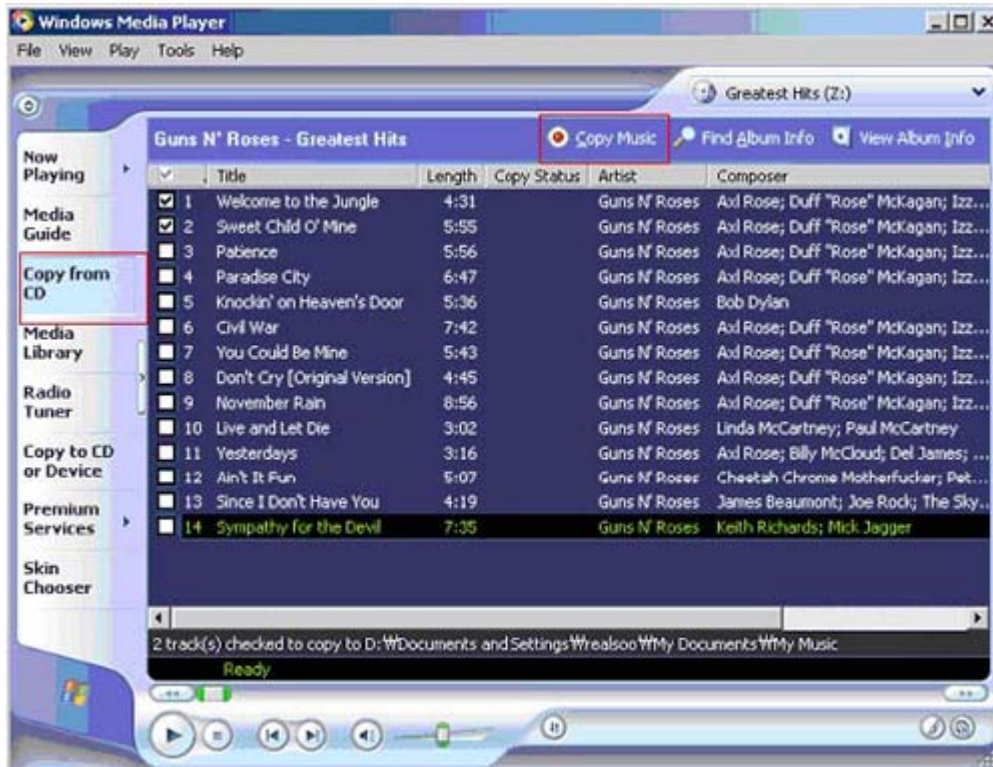

STEP 1) Copy the music of audio CDs with Windows Media Player. (Creating WMA DRM files)

* Insert the audio CD into the CD Rom Drive and select the tab "Copy from CD "in

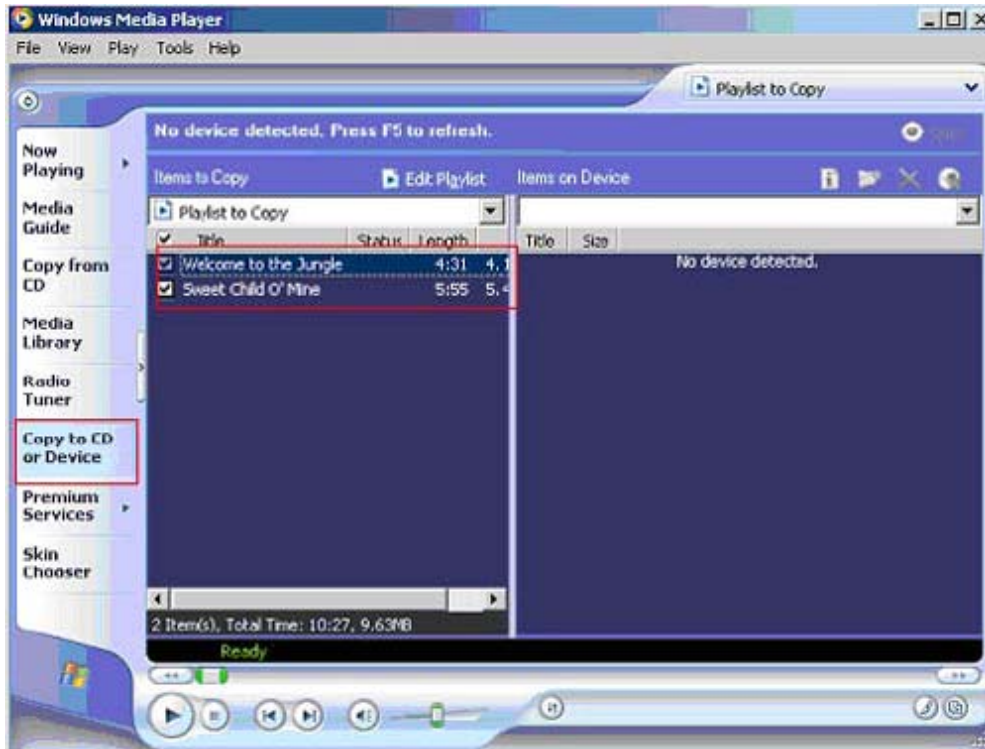

Windows Media Player. Now press "Copy Music. "

* The location to which music files of the audio CD are saved as WMA files can be changed by pressing the "Change "button at "Copy music to this location. "

STEP 2) Transfer the created WMA DRM files to DAH-1000(X)

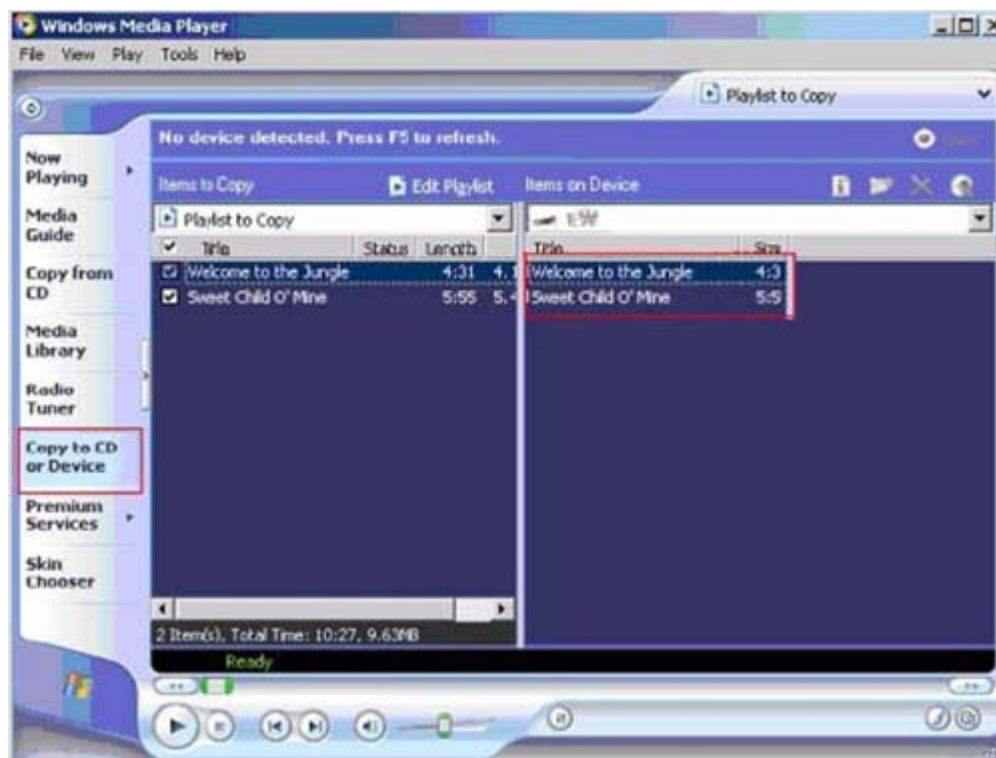

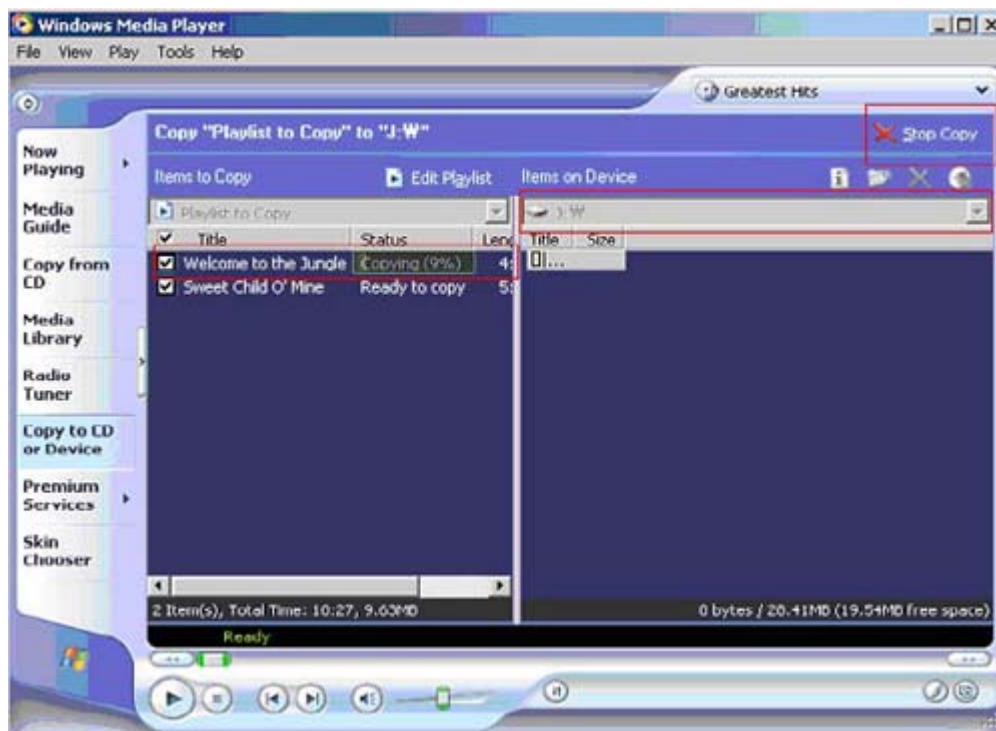

* Select "Copy to CD or Device "from Windows Media Player.

* Drag the WMA files created in "Step 1) "and drop them on the left st (Items to Copy) of the picture above.

* From the right area of the picture above, select the "Removable Disk (Drive Name:) "under "Items on Device. "

* Now cck the "Copy "at the top right and the WMA files will be transferred to DAH-1000(X).

- * When the transfer of the files is completed, disconnect the USB cable from DAH-1000(X).
- * Now you can check if the WMA DRM files (contents of the protected WMA files) are

played in DAH-1000(X).
