18:11 Bring out your dead! Bugs, that is.

Dearest neighbor,

Our scruffy little gang started this *samizdat* journal a few years back because we didn’t much like the academic ones, but also because we wanted to learn new tricks for reverse engineering. We wanted to publish the methods that make exploits and polyglots possible, so that folks could learn from each other. Over the years, we’ve been blessed with the privilege of editing these tricks, of seeing them early, and of seeing them through to print.

Now it’s your turn to share what you know, that nifty little truth that other folks might not yet know. It could be simple, or a bit advanced. Whatever your nifty tricks, if they are clever, we would like to publish them.

Do this: write an email in 7-bit ASCII telling our editors how to reproduce ONE clever, technical trick from your research. If you are uncertain of your English, we’ll happily translate from French, Russian, Southern Appalachian, and German.

Like an email, keep it short. Like an email, you should assume that we already know more than a bit about hacking, and that we’ll be insulted or—WORSE!—that we’ll be bored if you include a long tutorial where a quick explanation would do.

Teach me how to falsify a freshman physics experiment by abusing floating-point edge cases. Show me how to enumerate the behavior of all illegal instructions in a particular implementation of 6502, or how to quickly blacklist any byte from amd64 shellcode. Explain to me how shellcode in Wine or ReactOS might be simpler than in real Windows.

Don’t tell us that it’s possible; rather, teach us how to do it ourselves with the absolute minimum of formality and bullshit.

Like an email, we expect informal language and hand-sketched diagrams. Write it in a single sitting, and leave any editing for your poor preacher-man to do over a bottle of fine scotch. Send this to pastor@phrack.org and hope that the neighborly Phrackfolks praise be to them!—aren’t man-in-the-middling our submission process.

Yours in PoC and Pwnage,
Pastor Manul Laphroaig, T₆,G₆ S₆B₆
