B, C, AND D TRAFFIC CONES

DESCRIPTION

1. GENERAL

1.01 This section describes the B, C, and D traffic cones used to guide vehicular and pedestrian traffic around work areas.

1.02 This section is reissued to include the addition of the D traffic cone which supersedes the C traffic cone.

2. DESCRIPTION

2.01 The B, C, and D traffic cones are listed in Table A and are illustrated in Fig. 1 and 2.

2.02 The B, C, and D traffic cones are hollow to permit stacking. They are easily handled in stacks and can be carried in the quantities required to safely direct traffic and adequately protect work areas. Their resistance to impacts at low temperatures assures against them becoming brittle and subject to breakage during cold weather.
