1. GENERAL

1.01 This practice provides the acceptance test procedures necessary for evaluating the performance of the 5XB (No. 5 crossbar) switch mini-RTTU (remote trunk test unit). The acceptance tests contained in this practice are designed to verify that the mini-RTTU hardware and features are operational and that they conform to the original design intent. All failure conditions should be referred to the responsible AT&T Technologies installation group.

1.02 Whenever this practice is reissued, the reason(s) for reissue will be listed in this paragraph.

1.03 The procedures in this practice should be performed only after all of the installation test requirements have been met. The installation test procedures and results should be monitored and confirmed by the customer.
2. PREPARATION

2.01 This procedure provides the method to set up the mini-RTTU for testing.

<table>
<thead>
<tr>
<th>STEP</th>
<th>PROCEDURE</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Obtain the associated mini-ROTL (remote office test line) priming data base from the CAROT (Centralized Automatic Reporting On Trunks) center.</td>
</tr>
<tr>
<td>2</td>
<td>Obtain a portable data terminal with EIA (Electronic Industries Association) RS-232C interface capabilities.</td>
</tr>
<tr>
<td>3</td>
<td>Connect the EIA interface connector from the portable data terminal to the EIA connector on the front of the mini-RTTU.</td>
</tr>
<tr>
<td>4</td>
<td>Turn on power to the data terminal.</td>
</tr>
<tr>
<td>5</td>
<td>Set the data terminal controls per Table A.</td>
</tr>
<tr>
<td>6</td>
<td>At MC5P007A, depress the <strong>RESET</strong> button.</td>
</tr>
</tbody>
</table>

*Requirement:* A display similar to Fig. 1 is displayed.
3. ACCEPTANCE TESTS

A. Transmission Test With Talk and Monitor Callback

3.01 This procedure provides the method to perform a transmission test with talk and monitor callback.

<table>
<thead>
<tr>
<th>STEP</th>
<th>PROCEDURE</th>
</tr>
</thead>
</table>
| 1    | At the data terminal, enter the following command:  
    | GR:**/GR;RF;MTx;SA;9;TO!  
    | Where:  
    | x = Assigned call back digit. |
| 2    | Depress the RETURN key.  
    | Requirement: The following output message is received:  
    | GR:**/GR;RF;MTx;SA;9;TO!  
    | GR;jn/GR;RF;MTx;SA;9;TO!  
    | Where:  
    | jn = Job number  
    | x = Assigned call back digit. |
| 3    | Enter the following command:  
    | GT:01/GT;TN;priming;05;N;;NL;AB;AB!  
    | Where:  
    | priming = A valid priming string from a CAROT test for a 105 transmission test. |
| 4    | Depress the RETURN key.  
    | Requirement: The following output message is received:  
    | GT:01/GT;TN;priming;05;N;;NL;AB;AB!  
    | Where:  
    | priming = A valid priming string from a CAROT test for a 105 transmission test. |
| 5    | Enter the following command:  
    | RF:01/SC>SP!
<table>
<thead>
<tr>
<th>STEP</th>
<th>PROCEDURE</th>
</tr>
</thead>
</table>
| 6    | Depress the **RETURN** key. **Requirement:** The following output message is received:  
|      | OM:01/GC>CH;PT;2W;0!  
|      | OM:01/GC>AS;ID;NL;NL;NL;NL!  
|      | OM:01/SC;01;S;F!  
|      | OM:01/KC;SN!  
|      | RF:01/SC>SP;m1;m2!  
|      | Where:  
|      | m1 = Near-end measurement result  
|      | m2 = Far-end measurement result.  
| 7    | If the output message of Step 6 is received, proceed to Step 12.  
| 8    | If the output message of Step 6 indicates a **TO** (time-out) in either m1 or m2, return to Step 5.  
| 9    | If the requirement of Step 6 is not received, enter the following command:  
|      | **CM:01/CM;RL!**  
| 10   | Depress the **RETURN** key.  
| 11   | Return to Step 1 and use a different trunk identification number.  
| 12   | Enter the following command to release the trunk:  
|      | **CM:01/CM;RL!**  

Page 4
B. Line Test (Optional)

3.02 If the line testing option is provided with the mini-RTTU, this procedure provides the method to perform line tests of ringing, coin collect, and coin return.

<table>
<thead>
<tr>
<th>STEP</th>
<th>PROCEDURE</th>
</tr>
</thead>
</table>
| 1    | At data terminal, enter the following command:  
  `GR:**/GR;DC;M;DC;9;TO!`  
  2   | Depress RETURN key.  
  **Requirement:** The following output message is received:  
  `GR:jn/GR;DC;M;DC;9;TO!`  
  Where:  
  `jn` = job number.  
| 3    | Enter the following command:  
  `GT:01/GT;LN;xxxyyyy;OM;NL;BP;AB;AB!`  
  Where:  
  `xxxyyyy` = Telephone number for the coin station in the office.  
  4   | Depress RETURN key.  
  **Requirement:** The following output message is received:  
  `OM:01/GC>CH;PT;2W;O!`  
  `OM:01/GC>AS;xx;AC;NL;NL;NL!`  
  Where:  
  `xx` = Traffic status (ID idle or BY busy).  
| 5    | Enter the following command:  
  `TS:01/LT>MR;N!`  
  6   | Depress RETURN key.  
  **Requirement 1:** The following message is received:  
  `TS:01/LT>MR;N!`  

**A. Ringing Test**
AT&T 190-104-207

<table>
<thead>
<tr>
<th>STEP</th>
<th>PROCEDURE</th>
</tr>
</thead>
</table>

**Requirement 2:** The coin station rings.

7 Enter the following command:

`TS:01/LT>MR;N!`

8 Depress **RETURN** key.

**Requirement 1:** The following output message is received:

`TS:01/LT>MR;N!`

**Requirement 2:** The coin station stops ringing.

B. Coin Collect Test

9 At the coin station, insert a coin.

10 At the data terminal, enter the following command:

`TS:01/LT>CC;N!`

11 Depress **RETURN** key.

**Requirement 1:** At coin station, the coin is collected.

**Requirement 2:** At data terminal, the following output message is received:

`OM:01/LT;CN!`  
`TS:01/LT>CC;N!`

If coin was not collected, the following output message is received:

`OM:01/LT;CP!`

12 At data terminal, enter the following command:

`TS:01/LT>CC;F!`

13 Depress **RETURN** key.

**Requirement:** The following message is received:

`TS:01/LT>CC;F!`

C. Coin Return Test

14 At coin station, insert a coin.
STEP | PROCEDURE
--- | ---
15 | At data terminal, enter the following command:

   TS:01/LT>CR;Nl

16 | Depress **RETURN** key.

   **Requirement 1:** At coin station, coin is returned.

   **Requirement 2:** At data terminal, the following output message is received:

   OM:01/LT;CN!

   TS:01/LT>CR;Nl

   If coin was not returned, the following output message is received:

   OM:01/LT;CP!

17 | At data terminal, enter the following command:

   TS:01/LT>CR;FI

18 | Depress **RETURN** key.

   **Requirement:** The following message is received:

   TS:01/LT>CR;FI

19 | Enter the following command:

   CM:01/CM;RU

20 | Depress **RETURN** key.
C. Dual Line Appearance Verification (Optional)

3.03 If the dual test line option is provided with the mini-RTTU, this procedure provides a quick method to check the line appearance.

<table>
<thead>
<tr>
<th>STEP</th>
<th>PROCEDURE</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Dial the dual test line appearance telephone number.</td>
</tr>
<tr>
<td>2</td>
<td>Listen for the TPT (test progress tone).</td>
</tr>
<tr>
<td></td>
<td><strong>Requirement:</strong> The TPT is heard.</td>
</tr>
<tr>
<td>3</td>
<td>Disconnect from the test line.</td>
</tr>
</tbody>
</table>
D. Verify Central Trunk Test Unit Line Appearance

3.04 This procedure provides the method to verify the CTTU (central trunk test unit) line appearance.

<table>
<thead>
<tr>
<th>STEP</th>
<th>PROCEDURE</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>At mini-RTTU CTTU data set, verify the MC LED (light-emitting-diode) is lighted.</td>
</tr>
<tr>
<td>2</td>
<td>Dial the CTTU telephone number.</td>
</tr>
</tbody>
</table>
| 3    | Listen for a tone.  
  **Requirement 1:** Tone is heard.  
  **Requirement 2:** At mini-RTTU CTTU data set, TR and MR LEDs are lighted.  
  **Requirement 3:** After 10 to 20 seconds, TR and MR LEDs are extinguished. |
<p>| 4    | Remove data terminal. |</p>
<table>
<thead>
<tr>
<th>CONTROL</th>
<th>SETTING</th>
</tr>
</thead>
<tbody>
<tr>
<td>Half duplex/full duplex</td>
<td>Half Duplex</td>
</tr>
<tr>
<td>Parity</td>
<td>No parity</td>
</tr>
<tr>
<td>Auto line feed</td>
<td>On (or enabled)</td>
</tr>
<tr>
<td>Caps lock</td>
<td>On (or enabled)</td>
</tr>
<tr>
<td>Baud rate</td>
<td>300</td>
</tr>
</tbody>
</table>
