- iButtons can be inserted in any combination
- >10000 insertion/withdrawal cycles with no performance degradation
- Fastens to any convenient location

**DS1401-04**  
approximately actual size

**DESCRIPTION**

iButtons can now be conveniently accessed using the DS1401 and DS1402 MicroLAN™ Cables.

The DS1401 is connected to the computer using a DS1402BB8 or DS1402BR8 MicroLAN Cable and any Dallas Button Holder (DS1410, DS1412 or DS1414 series, for example) or DS9097(E) COM Port Adapter. The DS1401 mounts to any surface (top of tower computer, CRT, keyboard).

The DS1401 supports Dallas' MicroLAN architecture, allowing iButtons to be inserted into Button ports in any

combination. Each device's unique 64-bit ID makes location detection automatic.

The DS1401 uses DS9100A and DS9100B Touch and Hold Probe Stampings for ground and data contact, respectively. These stampings are designed for F5 MicroCans and dwelled contact.

The Front Panel Button Holder is available as 4 button version (DS1401-04, picture) and as 24 button panel DS1401-24. Both versions come with double-sided adhesive tape for mounting.
