Laptop/Palmtop Blue Dot Adapter

FEATURES

• Blue Dot Dual Receptor for momentary (F3/F5 Micro-Can) or dwelled contact (F5 MicroCan only) with velcro/adhesive backing to mount on objects

• True–ground interface to an RS232 COM Port for reading and writing iButtonTM devices

• Works with bipolar logic signals of ± 5V to ± 12V (RS232C) as well as unipolar signals of 5V to 12V

• Supports reading and writing at regular and Overdrive Speed

• Provides strong pull–up to 5V for Temperature iButton, Crypto iButton and EEPROM iButton

• Communicates at data rates of 9.6k (default), 19.2k, 57.6k and 115.2k bits/s

• Adapter is powered entirely from an RS232 interface

DESCRIPTION

The DS1416D is a sophisticated RS232 to 1–WireTM Adapter which performs RS232 level conversion and actively generates the 1–Wire communication signals. Together with an adequate TMEX software driver it enables an IBM–compatible laptop or Windows CE computer to directly read all and write any non–EPROM iButton devices connected to the adapter. 1–Wire communication is supported by the adapter for regular as well as Overdrive speed. The serial port must support a data transmission rate of 9600 bits/s. Under software control, the adapter can be set up for RS232 data rates of 19200, 57600 and 115200 bits per second. The two higher rates are recommended for communication at Overdrive speed with Overdrive capable devices connected to the 1–Wire bus. Since the DS1416D operates in a byte mode, every data byte received from the RS232 port generates eight time slots on the 1–Wire bus.

The DS1416D is based on the DS2480 Serial 1–Wire Line Driver chip and therefore is not a plug-in replacement for the DS9097 or DS9097E. The RXD/TXD Polarity Select input of the DS2480 is tied to Vdd (non–inverting).

The DS1416D is available in a variety of signal paths and connector types to the serial port of the computer supporting several models and brands. See figure 1 for the geometries, connector types and computer type the version of the DS1416D is custom–fitted to.
