Note: Questions or comments can be directed to Ben Venzke at bvenzke@intelcenter.com or bvenzke@leo.gov.

ATTENTION

The materials shown in this visual recognition guide are items used in the production of explosive belts for suicide operations. While the mere existence of a few of these items does not in any way confirm terrorist activity, the greater the number of items present when viewed in context may indicate activity connected to the production or use of explosive belts and warrant additional attention. It should also be noted that the materials shown here are not the only items that may be used to produce explosive belts. Comparable materials or completely different approaches may be utilized by the individual(s) assembling the device(s).

The images in this document were taken from a nearly 30-minute video in circulation among jihadi groups. The video provides detailed step-by-step instructions on how to produce explosive belts for suicide bomber operations. A copy of this video, "Suicide Bomber Instructional Video Restricted DVD Vol.1", is available from IntelCenter on DVD at an LES//FOUO level. Additional details can be found at http://www.intelcenter.com or by calling 703-370-2962.

As new materials are obtained, updates of this report will be made available. The most current version will always be available in the IntelCenter SIG of the FBI's LEO network.

Pipes & Detonators

• This is what the pipes look like when combined with a detonator

Voice: (703) 370-2962 Fax: (703) 370-1571
Email: info@intelcenter.com Web: www.intelcenter.com
PO Box 22572, Alexandria, VA 22304-9257 USA

Page 14 of 22 - v1.0 - 1 February 2005 Copyright © 2005 IntelCenter/Tempest Publishing, LLC - All Rights Reserved

Shrapnel

• The recommended shrapnel is spherical (as shown below) or cubical. It is recommended to be no less than 4mm in diameter and not to exceed 7mm.

Voice: (703) 370-2962 Fax: (703) 370-1571
Email: info@intelcenter.com Web: www.intelcenter.com
PO Box 22572, Alexandria, VA 22304-9257 USA

Page 15 of 22 - v1.0 – 1 February 2005 Copyright © 2005 IntelCenter/Tempest Publishing, LLC - All Rights Reserved

Shrapnel with Adhesive

• After the shrapnel is combined with the adhesive it will look like the below image and will remain flexible.

Voice: (703) 370-2962 Fax: (703) 370-1571
Email: info@intelcenter.com Web: www.intelcenter.com
PO Box 22572, Alexandria, VA 22304-9257 USA
