THE FIRST EARTH BATTALION

the warrior monk's vision

by Lt. Col Jim Channon, US Army

I envision an international ideal of service awakening in an emerging class of people who are best called *evolutionaries*. I see them as soldiers, as youth, and as those who have soldier spirit within them. I see them come together in the name of *people* and *planet* to create a new environment of support for the positive growth of humankind and the living earth mother. Their mission is to protect the possible and nurture the potential. They are the evolutionary guardians who focus their loving protection and affirm their allegiance to people and planet for their own good and for the good of those they serve. I call them evolutionaries, not revolutionaries, for they are potentialists, not pragmatists. They are pioneers, not palace guards.

As their contribution to a hopeful future, the warrior monks bring evolutionary tactics. They recognize that the world community of peoples demands hope from those who would operate as servants of the people. Services rendered by the warriors of the First Earth Battalion are specifically designed to generate workable solutions to defuse the nuclear time bomb, promote international relations, spread wise energy use, enforce the ecological balance, assist wise technological expansion, and above all, stress human development.

Armies are both the potential instruments of our destruction and the organized service that can drive humanity's potential development. They are the 'turn key' organizations that could either shift the energy of our world into a positive synergistic convergence, or bring us to the brink of the void. We have no choice but to encourage world armies to accept and express the nobility they already strive to attain. I can see their action expanding to include evolutionary work like planting vast new forests, completing large canal projects, helping in the design and construction of new energy-solvent towns, helping to clean up the inner cities, and working with the troubled inner city youth in young commando groups, and working harmoniously with other nations to see that the plentiful resources of our mother earth are equally shared by all peoples.

This will not be the first time that warrior monks have been active. In Vedic traditions, the warrior monk was a philosopher and teacher, and therefore a powerful transformational player. In the Chinese culture, the warrior was both a healer and teacher of martial arts. History affirms our own belief that there is no contradiction in the warrior and the service oriented monk prototypes living a completely harmonious, blended and parallel path when the basic ethic and service is 'loving protection' of evolution and humankind. There is no contradiction in having armies of the world experience the same ethic as they evolve in peaceful cooperation towards the greater good of all.

THE FIRST EARTH BATTALION

I welcome you to share in the Warrior Monk's vision, and also to share in helping it become a reality. We have no seriously satisfying alternative but to be wonderful.

It is sometimes difficult to determine how we have set ourselves against each other as nations, and even the more frustrating when we realize that the people of these nations are not really very different inside, and in fact have the same desires for growth and environmental balance and for prosperity that we have. But this is reality. And soldiers who have grown up in an 'arms race' world are obviously doing their job of protection when they come up with a new and more effective weapons package. But it is time for another approach, to use all of this military power for another end. It is time to give as much reward for the evolutionary contribution made by a soldier or an army as we have given in the past for the destructive contributions made on behalf of national defense. I know that this process will begin with the transformation of soldiers and evolutionaries everywhere on the face of our planet home. There are young men and women who already aspire to this level of service and who are ready to make a permanent commitment. They will begin to meet in small groups to provide a support system for the personal transformation of group members. And on a small scale, these groups will begin selected evolutionary programs in their units and their communities. This manual serves as a handbook for the development of these evolutionary players and the development of their operating teams.

All national level armies will begin to cooperate on ventures that stabilize the nuclear balance of terror. Joint teams could then patrol space

and counter local terrorist activities that threaten stability in any given areas. Evolved cooperation will stifle the arms race. Cooperation between the Soviets and American military could insure that neither side "tilts off the handle" in direct collision in some local arena of tension, which would precipitate both sides into a major nuclear war. And there are precedents for this type of cooperation unknown to the public. The US and Soviet military have parted together in Potsdam. They have exchanged academics at the Staff College level, and they have viewed each other's military exercises in recent years.

The great flow of historical events, habits, and international relations is not easy to change. It will take the patient, focused, loving and dedicated effort of warriors all over the world, people of different languages and cultures and all examples of humanity's infinite variety of expression. What I present in this manual is a small contribution to what surely must be a hope for peace and prosperity that lives in all hearts everywhere. It is not a set system of beliefs and ideas. It is a smorgasbord of new functional ideas. As you respond to these insights, you will be able to adjust them to your own operating style. They should flow into your culture and respond to your country's point of view. Any elaboration on these ideas can then come from your own study. They must work for everyone in some way or they won't really work.

THE FIRST EARTH BATTALION

dedication

The earth battalion declares its primary allegiance to **people** and **planet**. You can become a part of that allegiance right where you are simply by allowing the exquisite human being inside to come out. When it's out... help others to come out and then work together cooperatively to stay out — building the paradise that is possible when we cooperate with each other and our mother the earth.

THE FIRST EARTH BATTALION

THE FIRST EARTH BATTALION

The First Earth Battalion is a banner under which the forces of good in the world can unite and find strength in spirit with others who share a common goal. Warrior Monks are guardians of the good, guardians of humanity, nature and the planet. Warrior Monks in the United States Army are already teaching soft tactics. Others in the fields of economics, politics, and international affairs are already searching for new ways to work for the greater good in their own arenas. The modern Citizen Samurai in day to day existence is engaged in moral combat to reorganize and focus personal life to its highest good.

This manual was created from the ideas and teachings of over a hundred groups on the New Age Frontier of the West Coast of the United States. It is a primary tool to assist you in giving and getting the most possible from your experience in a human form in the physical realm of this planet earth. It will assist you in preparing for possibilities and events about which you may presently not even be able to dream. Prepare yourself so you will be ready... Begin your work locally until the call goes out for global action.

guidelines

The manual is a self instructional workbook which contains operational procedures for changing old patterns of action into new ones. The reader can benefit by practicing the exercises contained and by reading and studying the manual as a reference textbook.

Awareness training, bodywork, martial arts, and spirit work are included in the manual as well as the advanced tactical ideas of the First Earth Battalion itself. Visual concepts will help the reader grasp many of the multi-dimensional ideas. A bibliography is included for further study. Where possible, names and addresses of various groups are included for the training described.

The ideas included are the most powerful and workable concepts gleaned from visits to over one hundred advanced human performance useful for many to do the work in some detail and then periodically use the pages as "flash cards" to keep their awareness at the highest useful level.

This manual is experimental and will be revised after the first limited edition goes out... is critiqued... added to... and refined for mass consumption. The drawings and verbiage were executed by Jim Channon after each of his visits. The follow-up manuals or supplements promise to continue these reports from the frontier of the third wave world.

changing values

The world around us changes daily. Subtly but steadily the environment we operate in begins to suggest and sometimes demand changes in our behavior. All of a sudden things we once cherished don't have any value. New customs emerge as tastier alternatives. We change. We are changing. Enjoy this section that is essentially a reconnaissance report on the values emerging from the frontier peoples on the planet.

THE FIRST EARTH BATTALION

the warrior monk

those who strive after the truth and travel extensively in their quest are known as warriors. They are capable... they get the job done. Good soldiers are also known as warriors. THE FIRST EARTH wants the action orientation of the warrior... but tempered with the patience and sensitivity and ethics of the monk. These are the soldiers who have the power to make paradise. Why go for anything less.

THE FIRST EARTH BATTALION

Everyone in the FIRST EARTH is equally important in the eyes of the organization and will be provided for accordingly.

Status is achieved by the skill and dedication with which you do your chosen tasks. It is not considered important that everyone move up in the organization... only that their skill level moves up.

Leaders will be determined by those possessing group process skills and the other peculiar attributes of a leader.

THE FIRST EARTH BATTALION

All nations and all peoples have been represented in the roots of this country.

roots

Warriors of the spirit can see many values captured in the most widely communicated piece of printed material in history... THE ONE DOLLAR BILL.

First, E PLURIBUS UNUM describes the mixing of the races... an ultimate mission.

Next, the eagle faces the olive branch indicating peace is the preferred tactic.

Finally, the pyramid is capped by the spiritual eye indicating the order of the ages is to be completed by... THE SPIRIT.

It is America's role to lead the world to paradise.

personal evolution

The most advanced piece of technology present on this planet is the human being. No machine technology has anywhere near the versatile potential of a human system. Unfortunately, people-empowering ideas are scattered along the leading edge of the human potential movement and are embodied within the voodoo of many mystical traditions. This section brings together the best of "what works" from both frontiers so you may begin your journey as an aquarian warrior properly armed for this exciting adventure.

THE FIRST EARTH BATTALION

personal evolution

The universe is perfect just as it is. It gives you the individual, just what you need and no more. In this way you can experience a progressively more interesting life from moment to moment. When you cooperate with the universe, it makes this trip into an expanded awareness; a smooth and delicious experience. When you ignore the evolutionary masterplan, the universe will expand your awareness just the same, but the trip is then bumpy and often very painful. In this section of the manual you will be given insight into some time honored and also some new technology needed to make your personal adventure in this world both creative and enjoyable.

The manual focuses on key evolutionary actions that you can master. These actions can create positive visions for you that will change your life the very moment you begin practicing them. These actions will enable you to steer your awareness and therefore evaluate your experience through what have been heretofore boring or painful moments.

There are many ways to experience each moment. Some people seem to enjoy them all. Some masters can experience many of them in various states of ecstasy. But we know for most people, life has its ups and downs, and then there are some people who manage not to enjoy any of it at all.

Gaining leverage over the life experience can come through a key set of lessons for both success and enlightenment. Fortunately, the best schools on the subject moved to the United States in recent years and were available for our research. The following key technology has been selected from the works of over a hundred schools both orthodox and mystical, traditional and futuristic, and specially oriented on the paths of both personal and planetary evolution. These tools will work for you to the extent that you use them. That's a promise.

possible people

We are many things now...we can be many more....simultaneously. We can have great Dimension by daily cruising the scale of needs. At one end taking care of business and at the other taking care of spirit...We can simultaneously balance our mental approach during each event...touching feelings.. having visions and verbalizing solutions...while staying in touch with the overall quality of our spirit. We can plan our growth omnidirectionally guided by the strengths of the traces. check yourself now...how's your BEING, DOING, AND GROWING.

THE FIRST EARTH BATTALION

possibility thinking

Organizational structures often get like the dinosaur...their bodies become too big for their little mouths to feed. Management overhead, stagnant communications systems eventually topple the turkey. If however you have an early experience like a vietnam or a watergate...the more alert begin to look for a new operating style based on projected values and high powered mythology.

THIS IS HOW A FIRST EARTH BATTALION CAN HELP!

THE FIRST EARTH BATTALION

unity powered by diversity

Bucky Fuller's vector equilibrium illustrates how you can open up in many directions simultaneously and thereby secure the best combination of dynamic tension and integrity... CROW OUT.

By generating an environment of loving support, we can encourage people to OPEN UP.

Within that structure the individual is safe and trusting... at that moment the powers & skills that are within us all can come rushing out.. effort lessly and joyously.

Whats so amazing is that the structure is not material at all it is LOVE.

THE FIRST EARTH BATTALION

thinking skills

The human brain has seemingly unlimited potential. But, the bio-computer itself doesn't guarantee that the human who carries it around will be effective. the programs for that computer must be quality as well. Quality thinking is in demand. DeBono suggests the seven shifts on the left.

Allow your brain the chance to generate more options for you.

THE FIRST EARTH BATTALION

Don't wait for the future to choose you... choose it... now!

THE FIRST EARTH BATTALION

First wave thinkers or flat world folks are apt to raise their index finger and say, "I'm gonna tell you one thing!"

The second wave rational, or reductionist thinker will assert that this OR that will do, there isn't much middle ground.

The third wave thinker is a possibility thinker. He knows the more options you generate the better your chances to know or succeed at some task. He will say this AND that will do... according to the situation.

THE FIRST EARTH BATTALION

changing your program

It's not healthy and it's not fun to hold on to ways of thinking that get in the way of our growth. It's astonishing how easy it is to give yourself permission to dump programs that don't work. "Cultural cripples" can be healed as fast as they want to be.

The American Indian revealed himself as an individual by his distinctive ornamentation. His shield in some cases was more complete as a representation of his skills and predispositions than the modern soldier's personnel file.

EARTH BATTALION soldiers will be encouraged to represent themselves well in their dress, and wear a 12 pointed star with each axis clipped to reveal a dimension on a standard personality inventory test.

THE FIRST EARTH BATTALION

attention w/o tension

WHEN YOU FIND YOUR MOTOR IS RUNNING TOO FAST... TRY THIS 60 SECOND RELAXATION RESPONSE

One of the most ideal levels of consciousness to be in is attention w/o tension. The attention is a clear and present view of reality. You know intuitively the consequences of everything going on around you. But the nice part is that you are centered and grounded in such a way that you can deal with the entire process playing on 45 RPM or maybe even 33 1/3 RPM but never 78 RPM.

THE FIRST EARTH BATTALION

previsualization

Recent studies have shown clearly that we can effectively "PRACTICE" events in our minds. So, if there is something you would like to accomplish... do it in your mind first. Athletes have increased their performance dramatically with this picturing technique. When you think about it... this is the clearest way to send plans and orders to your body and psyche before you do something. PICTURE YOURSELF HEALTHY AND ENERGETIC... see if it catches!

the moment of knowing

Be open and trusting of the universe! Take a moment before you make a decision or generate a reaction to check your intuition.

It's that moment of quiet where you let all the truth that is come in. For some, the OM or energy hands will prepare for the answer. The answers are simple: YES ... NO ... NOT NOW or danger.

Then, if you must, give the problem to your rational bio-computer. (A)

Some people live moment to moment...they're outside. they can see the world from the outside...they read the music of life from the sheet with the notes printed on it. Other people live in the moment...they're inside...they feel the world with their bodies and they live the music of life by grooving on the things and moods that come to them. the conscious warrior stays awake enough to choose the way to process experience to best support the mission of service and enjoy it!!

Recently we have discovered the body responds to the electronic wave forms usually transmitted by radio television or microwave. We may soon select a diet based on the voltage each food offers.

Some of the things we do on this world have survival value. That is, certain acquisitions appear to have more value in afterlife than others. It is speculation, of course, but many belief systems have similar notions about what you can take with you. Many anticipate afterlife wherein you are with all the good friends you made. Points of view and languages directly contribute to the number of ways you can know something. Both contribute to Universal intelligence. What counts? knowing what GOD knows is getting more like GOD.

PHASE I. Locate/address/categorize the community organizations in your region. Have a way to call or communicate with each.

PHASE II. Determine the kinds of service each can perform. Some groups may only be able to meditate on an idea, others may be able to pack up and work on a dam project out of town for a week. Get the categories clarified.

PHASE III. Use the network to share information of importance to the community.

PHASE IV. Activate grand networks with regional tasks of interest to all. Do this on Friday.

Should a serious problem like an earthquake or financial crash effect your region... this kind of community cohesion would drastically reduce the chaos and generate the structure for recovery.

THE FIRST EARTH BATTALION

in the future

The Earth Battalion and its children will spawn an endless evolutionary stream of service oriented groups. The network exists... the technology is being refined and detailed plans for the forces are being drawn-up.

THE FIRST EARTH BATTALION

the warrior net

A primary function of the FIRST EARTH is to communicate ideas. Set up a network of information within your army and with friends in any army. Soon continental coordinators will emerge and then we will consider communications media other than the mail and telephone.

Let this battalion grow wherever there is interest.

THE FIRST EARTH BATTALION

ethical combat

The world is fast acquiring a planetary nervous system. More and more people everywhere have opinions about actions taken elsewhere on their planet. From this growing awareness created by telecommunications a new form of combat can evolve. It is called combat of the collective conscience. It calls to the most dedicated among you. It can be the beginning of the beginning. Here are the ingredients of that new technology.

THE FIRST EARTH BATTALION

ethical combat

Some critical events have occurred that have dramatically shifted the working dynamics of combat. These events and the advance of technical communications combine to create new criteria for winning and losing. Nations and armies that ignore the new ingredients for victory will suffer strange defeats which may grant them the battle but lose them the war.

During a critical moment in the war in Vietnam the world was exposed to the cold-blooded execution of a Viet Cong terrorist by a senior South Vietnamese government official. The news photo and film of this official firing a pistol point-blank into head of the terrorist flashed around the world to an excess of four hundred million people. No explanation could change the visceral and emotional reaction of the world. The South Vietnamese lost that war.

Recently a conflict involving Somoza's regime in Nicaragua was dramatically changed by an internationally broadcasted killing. A newsman under live camera coverage belied up to a member of Somoza's army and was shot to death in an apparently non-sensical way. The world watched. Somoza's government fell the next day.

The world with its elaborate international network of interconnected news systems has become a planetary nervous system. Hundreds of millions of people watch the camera-worthy events of any conflict wherein the camera is present. Also, humans all seem to manifest primary gut level reactions to unethical action. Put these elements together and you have established a new style of warfare. We call it the combat of the collective conscience. This combat projects the winning force as one which executes the more ethical action in the face of accompanying cameras. This changes the alternatives to force projection. It portends non-violent combat. It expands the boundaries of action and reaction.

Strategic objectives now include protecting cities. Tactical actions now include the projection of love and concern. The door is opened for joint US and Soviet cooperation.

THE FIRST EARTH BATTALION

evolutionary teamwork

Once you begin to feel your personal power and commitment you will ask . . . "How can I serve?"

This section includes the organizing and operating principles to help you actualize your own evolutionary team. It is not now practical or empowering to have a national or international hierarchy of first Earth Battalion units. What is useful is to build a team in your area that is specifically designed to transform the world around you. We then can share ideas as a grand network working everywhere simultaneously.

THE FIRST EARTH BATTALION

evolutionary teamwork

Well, the old rules and models for generating a large organizational structure just didn't seem an appropriate way to harness this new age enthusiasm. One thing that did surface however was that most of the individuals who continuously practiced and were satisfied with evolutionary work were organized in small autonomous groups of close friends. The other organizational development that had power was the network. Since the most powerful resource in the post-industrial world is information . . . the structure that best delivers and organizes information sources is the network.

So, what we are proposing is that if pursuing the Earth Battalion work is exciting to you, then organize your own small group following the suggested steps enclosed. Match the organization to the needs of your community and the personal development needs of your members. Use the First Earth Battalion name, as it empowers your group. When you are organized and operating . . . check back into the network with us and we'll generate some schemes that involve national and international action. Whether you connect into the international network right away is not significant. Think about what level of commitment your team could make when employed for a national concern. Can they leave town? For how many days? To do something physical? We'll let you know about the coordinating developments as they pop.

Use the attached ideas but be creative and enjoy the work and pleasure associated with your own continued growth and enlightened action.

evolutionary teamwork

In recent years there have been some very exciting evolutionary ideas put forward. One confounding factor was that the authors of these ideas were not prepared to organize the enthusiasm generated by their work. The common plea from the readers was "How can we serve?"

THE FIRST EARTH BATTALION

earth day

*making time
for good work*

If we believe in things like peace and taking care of the earth, then we must resource them accordingly. If peace is as important as collecting weapons for national defense, then we must resource peace with the same emphasis.

Since everybody can't insert themselves into an active role in peacemaking every week, we might consider something we can do . . . like take care of mother earth. Since the national work force is looking at a four day week, why not make fridays . . . EARTH DAY.

On EARTH DAY we spend our time working for PEOPLE AND PLANET. Those of a generation that helped cover the land with concrete . . . then begin to cover the concrete with plants . . . they can live together with some design and care. Let the young, who haven't yet begun to worry about environment . . . plant one or more trees. These trees can be their investment in a green future. Other larger organizations can replant and refurbish the forests grown up during their lifetimes.

It isn't true that only pure nature can grow the most beautiful habitats. People can consciously design and organize nature in a far superior way. Everyone's neighborhood can be a lush garden with the capability to feed the caretakers in times of need.

That could also be the day that your group met to improve themselves as individuals. A morning of work on the habitat and an afternoon working on self and group.

They can say that if you stare deeply into someone's eyes near you that you can see an inner light. The IDEA of course is to begin to allow people to appreciate each other's essence by increasing the intensity of eye contact.

PHASE II. The same people call again two weeks later in greater intervals and report: "We have finally discovered how to tell which people got the sparkly eyes first . . . and they can be spotted because they're the ones who automatically hug you upon greeting . . . etc . . . etc."

- ⑥ closing aspirations

The FIRST EARTH BATTALION is a grassroots idea. If it doesn't move you to some local team-building action then it isn't ready yet. If it does move you then don't ask to be spoon fed. Put a small team together and begin the WORK.

Mix a program of studying this manual and the related books recommended herein. Discuss things openly and develop a way for the group to pray or otherwise tune in to its higher self. Meet once a week. Begin by working on getting yourself awake, physically smoothed out and eating properly. The rest will follow. Sharing the ways you are improving makes for great group discussion material. Consider the lotus for your own personal program and the arrowed path as the sequence for the group work to follow. Read and discuss the books suggested. Do the trainings suggested if they are convenient to your area.

Once the team feels together and can agree on a benevolent service project, then begin to conduct benevolent raids in order to wake up your community to the truth. We can cooperate with each other, the biosphere and the universe if we choose to.

A circle of harmony is recommended to open and close the meetings. The specific way you do it is unimportant as long as there is a joining of hands and some silence. Right palm over left seems to generate a directional flow within the circle. The process unites the group with each other and the universe. GOOD HUNTING!!

ACTION: THE CIRCLE OF HARMONY

It's important to create unity for our transformational work. It is a Universal truth that we are all one and can call upon our higher selves if we choose to. The technology of unity appears complex, but is only a collection of very simple sense linking steps.

In order to feel as if you are one with your team, then all of your collective senses must be aligned. This is called sensory synch.

The eyes can be focused with a candle or guided imagery. The ears are best aligned with music that is repetitive in sound and phrase. Likewise each of the other senses is given a powerful and unique stimulus until everyone in the group absolutely feels as if they are one. They will in this case each be experiencing exactly the same sensory input for all their senses. The effect is exciting and spiritually comforting.

group synergy

People use the word synergy all the time. They know it means greater than the sum of the parts. But specifically what is going on? Here are some of the ways to know synergy when it happens in your group. It's often more than twice the sum of the parts!!

ACTION: SYMBOL LINKING

There are a set of emerging symbols that can unify all the forces on the planet who are in an evolutionary mode. These windows on the transformational process can more quickly unify global consciousness if we can agree to use them whenever and wherever we can.

warriorwork

realization

BODYWORK

The moments when serenity guides your physical conflicts with another or your movement through life.

BIOWORK

The moment when the care of your body instrument is more important than the taste of the food in front of you.

HEADWORK

The moment you begin to see when you are just reacting from a mind program within a culturally induced trance.

HEARTWORK

The moment when you recognize that deep inside we are all one.

SPIRITWORK

The moment that you appreciate the perfect order in the universe, the biosphere and your mind. Then you will sense the power of a masterplan.

PSIWORK

The moment you feel the universe send its own kind of energy tingling through your body and your mind takes off.

ECOWORK

The moment that you know that the plants around you are conscious as well as the air and earth mother below.

PEACEWORK

The moment you dedicate your life to actions on behalf of PEOPLE AND PLANET... then you have become a player.

FRAMEWORK

The moment you see you can step out of an organizational pattern and reprogram the system.

strategies

CONVENTIONAL RESPONSE—

THE ALLIES MUST REALIZE THAT THE PRINCIPLES OF WAR THAT APPLIED TO THE LARGER FORCE MUST NOW BE MODIFIED FOR THE SMALLER ALLIED FORCE.

NUCLEAR TRIPWIRE—

SINCE NUCLEAR RESPONSE IS BECOMING AN EXPECTED EARLY RESPONSE TO AGGRESSIVE ATTACK THE BULK OF CONVENTIONAL FORCES CAN BE REPLACED BY BORDERLINE FORCES.

STRATEGIC MISDEADEND—

THE CONFLICTS REQUIRING ACTIONS ARE SMALLER AFFAIRS PROPELLED BY TELEVISION. THE SOLUTION MUST BE DEFT, FAST AND CAMERA WORTHY.

A major shift in the criterion for victory has already begun. Since the advent of worldwide television coverage, the judgements for success in battle have changed. Victory will now accrue to the force that executes an action most consistent with evolving world values. Destroying your opponent and his property will in the long run equal defeat.

war has changed

• The day terrorists discovered television and mass news coverage they committed large scale acts with small scale forces and the need for strategic micro action arrived.

- The day most of the world watched war on television they all helped decide who won..... and from that point on conflicts were decided based on who had the most RIGHT not the most MIGHT.
- The day nuclear weapons were considered for use during the early moments of a conflict then the need for mass armies disappeared.

getting ahead of the future

Warfare currently comprises about 10 dimensions. In 1990 there will be 5 new additions... or five new areas the tax payers must bear.... or five new possible ways for the ultimate conflict to be triggered.

1990 ENVIRONMENT

the five new dimensions are:

- directed energy weapons
- space based platforms
- nuclear terrorism
- changed public awareness
- changed international collective conscience

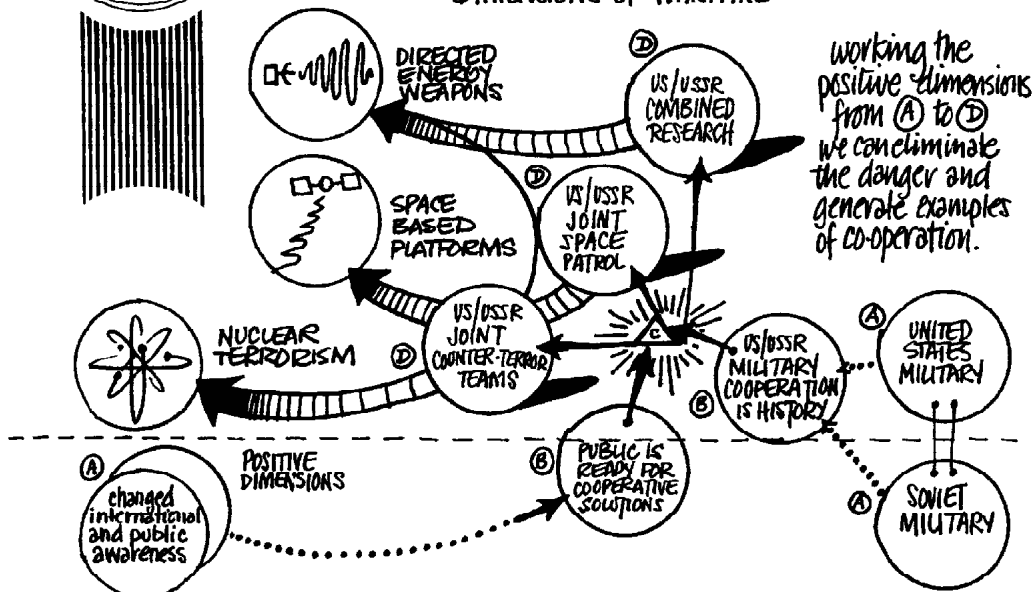

We need to WORK THESE DIMENSIONS NOW before they begin to work against us!

THE FIRST EARTH BATTALION

benevolent weapons

METHODS ARE AT HAND TO POSITIVELY USE THE EMERGING DIMENSIONS OF WARFARE

THE FIRST EARTH BATTALION

International power is more than ever determined by world opinion. The television camera has changed the power base of leaders and leaders have marshaled their people before the lenses and changed the course of history. The FIRST EARTH BN. understands that this kind of power is resolved in favor of the force that uses the higher ethical forms of ethical combat have been evolved for just this purpose.

soft combat principles

If you look for clear examples of where the free world has an advantage over the world of non-believers you will discover two resources that clearly stand out in our favor. They are GOD and microelectronics. The beauty in that is you can use the microelectronics to protect the spirit... Brains work like that. Hence the field of psycho electronic weaponry.

systematically defusing the planet has proven difficult... but almost overnight a contingent of soldiers and their families could be exchanged between the Soviet Union and the United States.

they would live and work and serve as a constant reminder to any party tempted to take nuclear advantage of the other.

Yes, there are many creative options other than the arms race.... whose in charge of creating those options?

THE FIRST EARTH BATTALION

intelligent initiative

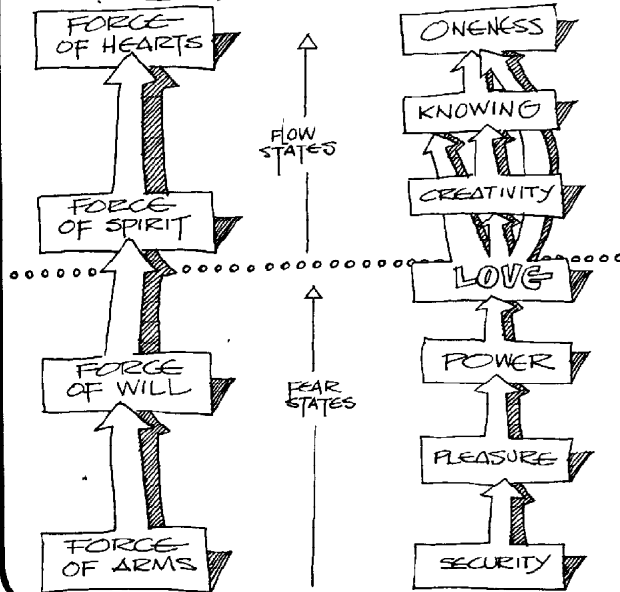

In the martial arts, one learns a number of possible counter moves against different types of possible enemies. These practice battles are done over and over until they become instinct. Likewise in the EARTH BATTALION all plausible engagements are war-gamed until each soldier has the routine cold. In this way the battalion can operate in the absence of commands from its leaders, who may be out of touch, because of the new realities of modern warfare.

THE FIRST EARTH BATTALION

ethical hierarchy

Both soldiers and units can achieve an ethical evolution. The benefits of this progress are both immediate and long range. Both soldiers and units can achieve FLOW states. When that happens work doesn't seem like work but everything gets done. Mental serenity doesn't produce lethargy it increases functional effectiveness.

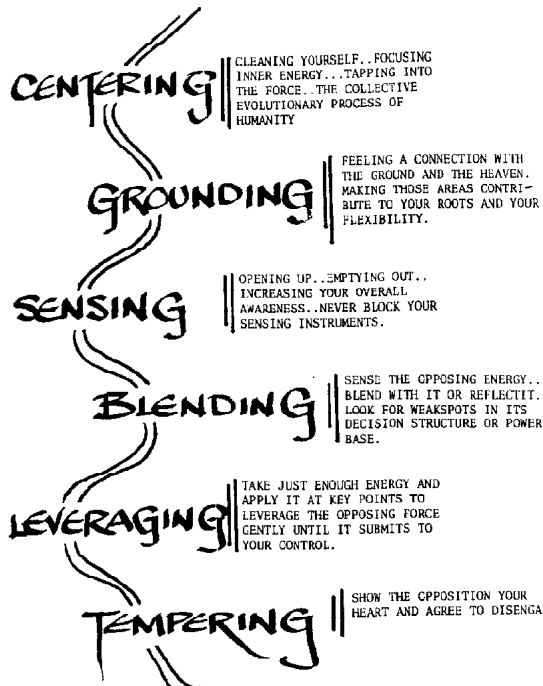

THE FIRST EARTH BATTALION

Whether you are a single warrior or part of a unit, these principles apply:

The ethic here is one of "loving protection". These principles are a blend of those martial arts disciplines that have already struggled with the concepts of ethics.

They can apply to strategy as well as tactics.

earthwork

In the end, progress is a reflection of how good we are to each other and to our mother... the EARTH. Here are the beginnings of EARTHWORK projects that could dramatically change the quality of our home... the PLANET. Organized military forces are the perfect catalysts for this action. Nature by itself is beautiful but nature nurtured by people is paradise.

THE FIRST EARTH BATTALION

hark! it's the natural guard

Natural wilderness is wonderful, but can't really compare with the result when man consciously organizes and nurtures the plants and waterways. The lack of care and attention paid to our mother earth is criminal compared with the results that could be forthcoming with a massive organized effort.

Armies have traditionally served as evolutionary agents in organizing and training nature. West Point was established to train military civil engineers. The Corps of Engineers today manages the nation's waterways. The work of massive reforestation for example is a natural for an organization with discipline, communications, and transportation.

Using school children and large elements of the unemployed sector the army could restore the ecological integrity of the earth mother as a primary job. They could support and project large elements of society into the countryside.

When the day comes when a large combat force isn't needed to fight abroad then the alternatives to combat must be surfaced as intelligently thought out plans that can generate the enthusiasm of soldiers and members of the community alike.

Forests can be planted by children propelled to the site by army reserve or active units. These forests could be designed to effect weather patterns, enhance the beauty of the countryside with some interesting planting designs and even be used to make energy efficient pathways for aircraft over the deserts wherein the air is thin. Combining forests with new low energy waterway transportation and new canals would restore the supportive potential of the land to support the nation in an era of diminishing resources.

In the average community, modern energy saving approaches run up against many of the most powerful Doli Pictans... they are not evil... they just want to prop up the companies already in operation.

let the army help!

an EARTH BATTALION suggestion:

the **ARMY** is a key element in the evolutionary jumps about to occur. the National Guard will power the **ALPHA FORCE** in human rescue. the army reserve will catalize major evolutionary projects as the **BETA FORCE**. the active army will train and run the **GAMMA FORCE** as they operate strategically to resolve conflicts. the planning for evolutionary work and the attainment of paradise is already part of the army's **DELTA FORCE**.

Military Organizations of the world have all been used to do evolutionary projects.

The American Army has been the leader in evolutionary work in this country:

- race integration
- computer revolution
- advanced schools
- social mobility
- rehabilitation
- sex integration
- systems revolution
- research & development

spirit work

The warrior-monk is empowered by spirit. The evolutionary actor can see the designing intelligence of GOD (spirit) in all belief systems and honors the spirit in all living creatures. Here are some ideas on how spirit is unfolding to those on the frontier. *You* however, must release yourself to the force inside you ... for no other descriptions matter in the end. The Earth Battalion honors all paths to enlightenment.

THE FIRST EARTH BATTALION

the angels are here

If in fact we want to have a heaven on earth... then a class of angels should come forth and begin the work.

Imagine that you must create a planet with conscious life in 9 steps!! First, you chunk together matter of like resonance. Position them in space using positive and negative fields. Activate them in spinning cycles so that the planets are tempered by warmth, air and sea circulation.

Next...seed in the conscious life in all colors and let it evolve to a tribal conscious mess. They, insert spiritual masters into the tribes...augmenta with some inspired master works.

Since humankind is programmed to seek novelty and truth...the other ingredient needed is supervisory challenge...events that jerk people from their cultural trance. Then subtle but tasty rewards are given to those who begin to work with the universe for its evolutionary refinement.

We take what is of value that is old... we take what is of value that is new... we evolve them ethically.. practice them diligently.. execute them willingly.. and die if we must. For if the action is in the cause of peace, one death may save the lives of thousands that are victims if the cause is war. This is right action.

There are many new and exciting resources to assist your team with their personal evolution. Some are written and some are packaged trainings. Depending on whether you have access to a large enough city to do any of the trainings you can choose the written offerings instead. Many of the books must also be purchased in alternative bookstores in relatively large cities. For that reason we have included a larger number of works, many of which should be locally available.

The trainings are all only as effective as the particular trainers you draw. Never-the-less, the trainings we have selected have a national reputation generally worthy of good quality control.

The *URANTIA BOOK* and *COURSE IN MIRACLES* can nicely support weekly discussions. Many of the rest of the books are best used for individual work.
