

RDX EXPLOSIVE (C4)

THIS EXPLOSIVE IS USED IN MAKING C4. C4 IS NOTHING MORE THAN 80GRAMS RDX PLUS 20 GRAMS FLOUR PLUS WATER. KNEED INTO A BALL AND YOU HAVE C4.

TO MAKE RDX YOU NEED:

HEXAMINE, STRONG NITRIC ACID, ACETONE, THERMOMETER, LARGE JARS, ETC...

PLACE ½ CUP NITRIC ACID IN LARGE JAR AND OBTAIN TEMP OF 25 DEGREES C. USE COLD WATER AND OR ICE.

ADD 18 TEASPOONS OF HEXAMINE AT ½ TEASPOON AT A TIME DURING A 15 MINUTE PERIOD. KEEP TEMP AT 25 DEGREES C.

ONCE ALL THE HEXAMINE IS ADDED, HEAT SOLUTION TO 55 DEGREES C. FOR 10 MINUTES.

ONCE DONE, REMOVE AND COOL IN ICE BATH TO 20 DEGREES C.

ADD 3 CUPS COLD WATER TO THE SOLUTION AND A WHILE SALT WILL APPEAR.

FILTER THE MIX THROUGH FILTER PAPER OR USE VACUUM FILTRATION TO OBTAIN THE CRYSTALS OF RDX.

WASH THE CRYSTAL BY PLACING IN A JAR WITH 3 CUPS WATER AND A TEASPOON OF SODIUM CARBONATE. STIR TO 3 MINUTES. FILTER AGAIN.

CRUSH INTO SMALLER GRANULES WHILE IT IS WET, LET DRY AND USE TO MAKE C4, ETC...

PURIFY BY HEATING ACETONE AND SUPERSATURATING THE ACETONE WITH RDX AND RECRYSTALLIZE INTO PURE RDX.
