

FINGER PRINT ERASER TECHNIQUES...

UUE EXCLUSIVE PLANS

SCIENTISTS HAVE MANY WAYS OF GETTING YOU, FINDING YOUR LOCATIONS, FINDING OUT WHERE YOU HAVE BEEN AND WHAT YOU WERE DOING AND EVEN GET SOME OF YOUR DNA. HOW DO THEY DO THIS...FIRST THEY MUST HAVE EITHER A WITNESS OR MATERIAL EVIDENCE. WITNESSES CAN BE ELIMINATED BUT MATERIAL EVIDENCE IS HARD TO FIGHT. SO DON'T LEAVE ANY...

THE FINGERS HAVE FOUR THINGS THAT CAN USED TO INCRIMINATE YOU:

1. OIL
2. PRINT
3. RESIDUE
4. DEAD CELLS

1. OIL, THE OIL CAN BE CROSSED WITH YOUR OWN AND THEY MAY MAKE A MATCH.

2. PRINT, THE PRINT IS CARRIED ONTO WHATEVER YOU TOUCH BY THE OIL. PRINTS CAN LAST FOR A WHILE.

3. RESIDUE, THE RESIDUE FROM THINGS THAT YOU TOUCHED OR ATE, ETC...MAY BE ON YOUR FINGERTIPS OR UNDER YOUR NAILS.

4. DEAD CELLS, THE CELLS THAT DIE AND FALL OFF YOUR FINGERS MAY BE COLLECTED AND DNA MAY BE EXTRACTED WHICH IS EXTREMELY HARD EVIDENCE.

THERE ARE TWO FOOL PROOF WAYS TO STOP THE ABOVE FOUR THINGS FROM BEING USED AGAINST YOU. THE MOST SIMPLE WAY IS TO USE GLOVES, BUT THE PROBLEM WITH GLOVES IS THAT THEY ARE TOO CONSPICUOUS AND MAKES PEOPLE ALREADY SUSPECT YOU BEFORE YOU HAVE EVEN DONE ANYTHING. EVEN RUBBER GLOVES THAT ARE CLEAR STILL HAVE A LOOK THAT ANYONE CAN SEE, AND START WONDERING WHAT YOUR UP TO. IF YOU DO WEAR GLOVES YOU MUST GET DARK OR

CLEAR GLOVES THAT ARE CLOSE IN RESEMBLENCE TO YOUR SKIN COLOR OR COLOR THEM. GLOVES STILL HAVE THEIR PROBLEMS:

- 1. THEY MUST BE PUT ON AND TAKEN OFF, THIS LEAVES RESIDUE AND OILS ON THE OUTSIDE OF THE GLOVES AND POSSIBLY LEAVES DEAD CELLS AND OTHER CONTAMINATES THAT MAY RUB OFF ONTO YOU DEED.**
- 2. THEY MAY RIP OR TEAR, THIS IS TOTALLY UNACCEPTABLE AND CAN CAUSE YOU TO GET YEARS IN PRISON.**
- 3. THEY ARE EASY TO SEE AND MAKE ANYONE A SUSPECT.**
- 4. THEY MAKE IT HARD TO HOLD ON TO SMALL OBJECTS AND ELIMINATE YOUR SENSE OF MINUTE FEELING IN THE FINGERS AND HANDS.**
- 5. THEY MAKE YOUR SWEAT WHICH IS NOT NICE.**

IT IS UP TO YOU IF YOU WANT TO USE GLOVES.....NOW LEARN OUR WAY THAT WORKS EXTREMELY WELL AND CAN BE DONE FOR UNDER \$1.00.

WE HAVE TWO WAYS TO ERASE YOUR PRINTS TEMPORARILY:

- 1. USE OF AN ACRYLIC ACETATE GLUE ON THE FINGER TIPS.**
- 2. USE OF AN ACRYLIC LAYTEX GLUE ON THE FINGER TIPS.**

1. ACRYLIC ACETATE GLUE IS NOTHING MORE THAN SUPER GLUE!!! IT CAN BE APPLIED AS IS BY JUST SMEARING IT ONTO THE FINGER PRINTS OR MAY BE UTILIZED TO HOLD A SMALL PIECE OF RUBBER OR SAND ONTO YOUR FINGER PRINT FOR EXTRA ADDED GRIP. CUT OUT SMALL SECTIONS OF RUBBER LAYTEX FROM RUBBER GLOVES AND SPREAD THE SUPER GLUE ONTO YOUR FINGER PRINTS AND PRESS YOUR FINGER ONTO THE LAYTEX, THESE WILL LAST FOR ABOUT 3 WEEKS. THE SAND METHOD WILL LAST FOR ABOUT 2 WEEKS. DO NOT USE THESE METHODS FOR MORE THAN TWO MONTHS AT A TIME OR YOUR FINGER TIPS MAY GET INFECTED OR HAVE PROBLEMS.

2. ACRYLIC LAYTEX GLUE IS NOTHING MORE THAN FINGER NAIL POLISH!!! IT MAY BE PAINTED ON JUST LIKE IT IS MEANT TO BE. JUST PAINT IT ONTO THE FINGER PRINTS AND LET IT DRY. THESE WILL GENERALLY ONLY LAST FOR ABOUT ON MISSION OR HALF A DAY

DEPENDING ON HOW ROUGH YOUR ARE WITH YOUR FINGERS. YOU MAY WISH TO SPREAD A THIN LAYER OF SUPER GLUE UNDER THE COAT OF FINGER NAIL POLISH, THE NAIL POLISH WILL GIVE YOU EXTRA GRIP.

THE BEST SUPER GLUE TO USE IS THE GELLED TYPE OR THICK SUPER GLUE. IT WILL NOT RUN DOWN YOUR FINGERS OR GET ALL OVER THE PLACE. THE NEAT THING ABOUT SUPER GLUE IS THAT IT BONDS SKIN MOLECULES SO THEY WILL NOT COME APART. IT CAN BE WASHED OFF WITH ACETONE. DO NOT TRY SPREADING THE GLUE WITH YOUR OTHER FINGERS OR THEY WILL STICK TOGETHER IN A MATTER OF SECONDS.

THE BEST NAIL POLISH TO USE IS THE CHEAPEST. THE CHEAPER THE BETTER BECAUSE THEY WILL NOT HAVE ADDED AS MUCH NAIL NURISHING CHEMICALS TO IT AND THERE FORE WILL NOT COME OFF AS EASILY. BUY A COLOR THAT CLOSELY RESEMBLES YOUR OWN SKIN COLOR. IT IS A GOOD IDEA TO CLEAN OFF YOUR FINGER TIPS WITH DAWN DETERGENT OR SOME OTHER OIL CUTTING SOAP BEFORE USING NAIL POLISH.

ACETONE CAN BE USED TO CLEAN BOTH METHODS OFF YOUR FINGER TIPS. WHAT MORE COULD YOU WANT.

TIPS:

DO NOT MIX ANYTHING WITH THE GLUES.

WHEN EVER YOU WASH THE GLUES OFF WITH ACETONE DO NOT HAVE ANY FLAMES AROUND.

MAKE SURE YOU USE GEL SUPER GLUE, IT IS MUCH BETTER.

WE FOUND THAT IF YOU USE FINE SAND ON THE FINGER PRINTS WITH THE SUPER GLUE IT WORKS BETTER THAN THE LAYTEX RUBBER SECTIONS. TO MAKE FINE SAND POWDER JUST HAMMER SOME SILICON SAND AND USE IT. PLACE THE GLUE ON THE FINGER PRINTS AND PRESS YOUR PRINTS INTO THE SAND, WALLA!!!

HAVE THE SUPER GLUE OR NAIL POLISH WITH YOU WHILE ON YOUR JOURNEY. IT MAY COME IN HANDY FOR OTHER THINGS OR YOUR PRINTS MAY START COMING THROUGH.
