

EXPLODING TIP BULLET

22CAL, 9MM, 12GA

SOUNDS NICE HUH? TO BUY CHEAP BULLETS FROM THE SPORTS OUTLET AND CONVERT THEM SIMPLY AND EFFICIENTLY INTO EXPLODING TIP BULLETS THAT TEAR AND RIP APART FLESH AND OTHER SURROUNDING OBJECTS ALL WITH EASILY BOUGHT MATERIALS AND SIMPLE COMPOUNDS THAT CAN BE MADE IN YOUR KITCHEN FOR LESS THAN .10 CENTS FOR MATERIALS.

22 CAL

22 CAL BULLETS ARE THE ASSASSINS PERFECT CHOICE FOR SILENT AND DEADLY CLOSE RANGE KILLS. THEY KILL WHEN USED PROPERLY. THEY ARE VERY FAST AT AROUND 2200FPS AND CARRY A SMALL KICK THAT IS CAPABLE OF PUNCHING A HOLE IN YOUR HEAD.

THE BEST 22 CAL BULLETS TO USE FOR THIS CONVERSION ARE "SEE"SEE"EYE" BULLETS OR SOME OTHER BRAND THAT HAS A THICK COPPER COAT ON THE LEAD BULLET. BUY HOLLOW POINT IF YOU WANT THE EASIER WAY.

PROCESS:

YOU WILL TAP AND DRILL A HOLE ($7/64^{\text{TH}}$ OR $1/8^{\text{TH}}$) DIRECTLY IN THE TOP OF THE BULLET. THIS HOLE SHOULD BE MADE TO GO TO THE POINT WHERE THE BULLET AND THE SHELL MEET. THIS WILL ALLOW A COUPLE MM OF LEAD TO ACT AS A BARRIER BETWEEN THE POWDER AND THE EXPLOSIVE. YOU WILL THEN USE EITHER MIX 1 OR MIX 2 IN THE TIP. PRESS THE EXPLOSIVE IN PLACE AND PACK IT TIGHT, LEAVE JUST ENOUGH SPACE FROM THE TIP OF THE BULLET SO IT IS FLUSH BUT SLIGHTLY CONCAVE INWARD. PLACE A SINGLE SMEAR OF SUPER GLUE OVER THE TIP TO SEAL AND HARDEN IT. LET DRY AND SET FOR A COUPLE HOURS BEFORE USE. THAT'S IT. THIS BULLET WILL DO 4-6 TIMES MORE DAMAGE THAN A REGULAR HOLLOW POINT 22 BULLET DEPENDING UPON WHAT IT HITS.

THIS SAME PROCESS CAN ALSO BE USED TO MAKE POISONOUS TIPPED BULLETS. GOTO [HTTP://WWW.INFO-LABS.COM](http://www.info-labs.com) TO BUY PLANS FOR REALLY GOOD POISONS AND BIOLOGICAL AGENTS. A 22 CAL BULLET CAN CARRY

ENOUGH RICIN IN IT'S TIP TO KILL YOUR TARGET A PAINFUL 12 DAY DEATH THAT LEAVES NO TRACE AND MAKES THE DEATH LOOK NATURAL.

9MM OR 45 CAL

9MM AND 45 CAL ARE THE OTHER TWO ROUNDS PREFERRED BY ASSASSINS AND LAW ENFORCEMENT. THEY KICK ASS. 9MM IS USED BECAUSE IT IS LIGHT FOR IT'S POWER AND IF USED PROPERLY CAN DO GREAT DAMAGE AND HAS GOOD KNOCK DOWN ABILITIES. A 45 CAL CAN EASILY KNOCK SOMEONE DOWN BUT THEY ARE BIGGER AND HAVE A HARDER KICK SO RAPID FIRE IS MINIMAL WITH THIS ROUND VERSES A 9MM. SO MY CHOICE IS THE 9MM OVER THE 45CAL ANYDAY. A 45 CAL WILL DEFINATELY OPEN A DOOR FASTER.

THE BEST 9MM BULLETS FOR THIS PROCESS ARE FULL METAL JACKETED FLAT NOSE OR MATCH BULLETS. HARDENED LEAD MATCH BULLETS WILL WORK ALSO BUT DO NOT HAVE THE INTEGRITY OF A FULL METAL JACKET BULLET.

PROCESS:

YOU WILL DRILL A HOLE DIRECTLY IN THE TOP OF THE BULLET. THIS HOLE CAN BE EITHER 3/16TH, OR 13/64TH, DEPENDING HOW YOU ARE DRILLING IT. WITH A MILL OR DRILL PRESS OR HAND DRILL. IF YOU ARE USING A MORE STABLE METHOD USE THE LARGER SIZE BIT. BIGGER IS BETTER BUT LEAVE AT LEAST 2MM OF LEAD AROUND THE CHARGE. THIS TIME YOU WILL DRILL 3/4 OF THE WAY IN, NOT TO THE EDGE OF THE SHELL BUT REAL CLOSE. LEAVE ABOUT 1 OR 2 MM EXTRA. PACK MIX 2 OR MIX 3 IN THE HOLE AND DO AS BEFORE AND PRESS THE CHARGE IN CONCAVE AND SEAL WITH SUPER GLUE.

9MM IS ALSO GOOD FOR POISON TIPPING BUT IT MUST BE DONE DIFFERENTLY THAN A 22. YOU MUST DRILL 2 HOLES THROUGH THE SIDE OF THE BULLET AND THEN A HOLE DOWN THE CENTER. THE TWO SIDE HOLES MUST BE MADE A DOWNWARE ANGLES SO THE POISON WILL SQUIRT OUT UPON IMPACT WITH THE FLESH. THE PRESSURE WILL FORCE THE POISON INTO THEIR BODY THROUGH THE SMALLER HOLES IN THE SIDES OF THE BULLET.

12GAUGE SHOTGUN SLUG

THIS IS THE MAMMOTH ROUND TO CONVERT TO EXPLODE. IT IS VERY POWERFUL AND DEADLY. IF DONE PROPERLY IT CAN BLOW CINDER BLOCKS APART EASILY. NOW THAT'S POWER. SHATTERING POWER.

YOU WILL NEED TO GO SHOPPING FOR THE RIGHT SLUGS. BUY ONLY SOLID THICK SLUGS, EVEN SABOT COPPER OR SOLID HARD LEAD SLUGS. THEY MUST BE THICK AND HEAVY DUTY. CAREFULLY REMOVE THE SLUG WITHOUT DAMAGING THE SHELL. YOU SHOULD BE ABLE TO REVERSE THE REMOVAL PROCESS WITH EASE OR YOU ARE TOO STUPID TO DO THIS PROCESS AND SHOULD STOP NOW AND THROW EVERYTHING AWAY NOW.

PROCESS:

TAP A START IN THE TOP OF THE SLUG AND DRILL A STARTER HOLE WITH A 1/4 INCH BIT. WORK THE HOLE TO EITHER 3/8 OR 25/64. NO BIGGER FOR INTEGRITY'S SAKE. THIS IS SLIGHTLY COMPLICATED SO PAY ATTENTION.

FILL THE HOLE HALF FULL OF BLACK PASTE MIX AND LET COMPLETELY DRY, TRY TO PACK IT IF POSSIBLE. FILL THE HOLE THE REST OF THE WAY WITH MIX 1 OR MIX 2. LEAVE 1 MM AT THE TOP. PLACE A THIN LAYER OF SUPER GLUE ON TOP TO FORM A PROTECTIVE LAYER. ONCE DRY LAYER IT 2-3 MORE TIMES TO THICKEN IT. ONCE DRY ENAMEL THE TOP WITH NAIL POLISH. USE 2-3 LAYERS OF POLISH. THAT'S IT.

YOU DON'T NEED TO PUT POISON IN THIS THING...IF IT HITS SOMEONE THEY WILL EITHER DIE OR EVENTUALLY DIE.

EXPLOSIVE BULLET COMPOUNDS:

MIX 1

1 PART POTASSIUM CHLORATE

1/4 PART SULFUR POWDER

1/4 PART CHARCOAL POWDER

MIX 2

(REMOVE THE TIPS OF WHITE MATCH HEADS AND MAKE INTO POWDER)

1 PART MATCH HEAD POWDER

1/2 PART 22 CAL SMOKELESS POWDER FROM THE SHELL

MIX 3

1 PART POTASSIUM NITRATE

1/3 PART CHARCOAL POWDER

1/8 PART SULFUR POWDER

MOISTEN WITH WATER, MIX, LET DRY AND MAKE INTO POWDER
