

# *Certificate of Calibration Validity*

*This certifies that at the time of service this product was tested and calibrated in accordance with documented procedures.*

Test equipment used is calibrated in accordance with the requirements of ANSI / NCSL Z540-1 and is traceable either to International / National Standards, to Company Standards (where no National Standards exists) or is verified by ratio-type measurements using self-calibrating techniques.

Supporting documentation relating to the traceability of measurements made is on file and is available for inspection upon requests to the Company.

**At the time of manufacture, the instrument performed within its published performance specifications.**

**Instrument Type Number: 1500**

**Serial Number: 1567**

**Date: 17 OCTOBER 2002**

**Approved Signatory:**

**An Aeroflex Company**
